JDC MAGAZINE
JANUARY 2026

The Jeju Free International City Development Center (JDC) publishes its digital magazine **Dream of Jeju** to share Jeju’s vision as a Free International City and work together toward its realization. This January issue returns with the theme “A New Year Beginning with the Spirit of Hallasan” and marks JDC’s energetic start to the new year. It features the organization’s New Year’s greeting, the Young Leaders Forum highlighting the future being shaped by young leaders, the launch of the Citizen Innovation Group that will help drive JDC’s transformation, and the inauguration of Global Friends.

As a public enterprise under the Ministry of Land, Infrastructure and Transport, JDC remains committed to enhancing the quality and completeness of its core projects in tourism, education, healthcare, and advanced industries, while identifying new growth engines to strengthen the foundation for Jeju’s future development.

Moving Forward as the Red Horse Toward a Better Jeju and a Stronger Korea

The Year of the Red Horse, 2026, has begun.

Traditionally, the horse has symbolized diligence and forward momentum. In a time of ongoing change, JDC will build on its accumulated experience and take measured steps as we prepare for our next phase of growth in the year ahead.

As a public institution, JDC will continue to meet its responsibilities with a strong focus on safety and accountability, while pursuing sustainable management practices that earn the trust of both the public and the residents of Jeju.

We will take a close look at the projects we have undertaken to date and strengthen the foundation for Jeju's future in line with national policy priorities. By doing so, JDC aims to deliver tangible results through infrastructure development that respects Jeju's natural environment and builds on the region's unique strengths.

JDC will also further strengthen its commitment to shared growth with the residents of Jeju. We will place the principle of building Jeju's future together with the local community at the heart of every project we undertake.

The challenges ahead in 2026 will not be easy. However, by drawing lessons from past difficulties, JDC will continue to define its long-term role and responsibilities as a public institution with greater clarity and purpose.

As JDC continues its work toward a better Jeju and a stronger Korea, we will remain focused on our mission, guided by the spirit of the Red Horse.

Wishing you abundant blessings in the New Year.

January 2026

Kwak Jin-kyu

Acting President

Jeju Free International City Development Center

**Opening the Way to Jeju's Future:
The JDC Labor Union
Stands as a Strong Partner**

The Year of the Red Horse, 2026, has begun.

We hope that the strength and forward momentum symbolized by the horse bring renewed energy to the lives of Jeju's residents, and that peace and happiness be shared in every home throughout the year ahead.

As we welcome the new year of 2026, the JDC Labor Union aims to serve as a strong and reliable driving force behind JDC, united around the shared goal of advancing Jeju's development. We understand that when JDC's projects are successfully implemented, the regional economy grows stronger and the benefits returned to the people of Jeju expand. With this understanding, the labor union will support JDC's continued progress in the year ahead with the following commitments.

To ensure the successful delivery of JDC's projects, labor and management will work together as one team. When it comes to shaping Jeju's future, there is no divide between labor and management.

The JDC Labor Union will focus on offering constructive solutions rather than unnecessary conflict, so that JDC can carry out its mission effectively.

The labor union is also committed to helping build a more capable and effective JDC that meets the expectations of the people of Jeju.

To that end, we will work to remove outdated and unreasonable internal practices and foster a work environment where employees can focus on doing their jobs well and delivering results.

At the same time, the labor union will keep its focus firmly on shared growth with the people of Jeju.

While we support JDC, we will do so with the clear understanding that our efforts must ultimately serve the residents of Jeju.

In 2026, the JDC Labor Union will move forward with a renewed sense of purpose, grounded in the values that define who we are. We will continue to walk alongside the people of Jeju to ensure that our institution serves its role in supporting Jeju's development.

Together with the residents of Jeju, we will work to build a stronger and more inclusive path toward a Jeju Free International City where people can look to the future with confidence and hope.

We wish you a happy and prosperous New Year.

Recognizing the Second Group of Proactive Action Award Recipients

To encourage a culture of proactive action across the organization, JDC held its second Proactive Action Award (J-ACT) program and presented awards to outstanding employees at a ceremony on November 24. Through initiatives like J-ACT, JDC continues to take meaningful steps forward by recognizing employees who lead positive change from within.

From Action in the Field to Organizational Growth

Building on the momentum of its first Proactive Action Award program, JDC received 31 submissions in the second round, with 15 employees nominated for recognition, reflecting strong and continued interest across the organization. Following a final review by the Proactive Action Review Committee, Hong Dan-bi of the Industrial Development Office and Kim Jun-yong of the Safety Management Team were selected as this year's award recipients.

Hong Dan-bi was recognized for actively leading corporate attraction efforts at the Advanced Science and Technology Park and for establishing a structured support system that strengthened the growth potential of tenant companies and improved overall satisfaction.

Kim Jun-yong was honored for enhancing collaboration with partner companies through the regular operation of safety and labor councils, as well as for contributing to the development of a stronger occupational safety and health management system within the organization.

Each award recipient receives a cash prize of 200,000 won along with a Proactive Action Award gift, and exemplary cases are shared across the organization. JDC will continue to recognize employees who address challenges on the ground and place the public interest first, reinforcing a culture in which small, practical actions come together to drive meaningful and lasting change throughout the organization.

Beyond Support : Building a Platform for Regional Industry Growth

**Hong Dan-bi,
Deputy Director,
Industrial Development Team**

Please introduce yourself.

Hello, my name is Hong Dan-bi, and I am a Deputy Director with JDC's Industrial Development Team. I currently work with technology startups based at the Jeju Advanced Science and Technology Park, supporting their growth through investment linkages and overseeing the operation of the Jeju Innovation Growth Center, Route 330.

Please describe the key elements and background of your proactive action case.

As JDC's financial conditions changed, the operating environment for many projects shifted significantly. In the case of Route 330, we believed it was important to redesign the program rather than discontinue it altogether. Beginning in 2024, budget reductions and the end of the existing outsourced operation placed the program at

a critical crossroads, where neither maintaining the status quo nor scaling it down was a realistic option.

Our greatest concern was that suspending the program could lead to tenant companies leaving, damage JDC's credibility, and weaken Jeju's broader startup ecosystem. In response, we moved away from a model centered on outsourcing and simple financial support and transitioned to a structure in which JDC directly plans and operates the program. At the same time, we built strategic partnerships with private accelerators and venture capital firms, companies, and related institutions to establish a new operating framework.

Under this model, JDC focuses on planning and coordination, while private partners take the lead in technology demonstration, investment review, and commercialization. Our goal was to create a continuous pathway from technology validation to investment and eventual returns. Rather than pushing for short-term results, we prioritized close coordination with internal departments and building trust with private partners to encourage meaningful participation.

As a result, Route 330 is moving beyond a one-time support initiative and taking shape as a sustainable startup support model. The framework is now functioning in practice, linking technology demonstration and R&D with private investment, fund recovery through JDC-backed investments, and listing in the KOSDAQ market.

JDC Route330

What does this proactive action case mean for JDC?

Traditionally, startup support in Jeju has focused on early-stage assistance and short-term, single-year programs. In that context, this case is meaningful because it demonstrated that public-sector startup support at JDC does not have to end as a one-time initiative, but can instead lead to tangible, long-term outcomes.

Route 330 stands out in that it goes beyond grant-based or short-term support and creates a virtuous cycle that connects investment attraction and returns, ESG-based technology demonstration, and links to public procurement. Through this process, the program showed that JDC can move beyond the role of a support provider and function as a platform that actively underpins the growth of regional industries.

I believe this experience served as an important opportunity to demonstrate, both internally and externally, the broader role JDC can play in fostering sustainable industrial growth in Jeju.

As an Outstanding Proactive Action Award recipient, what would you like to focus on going forward?

I would like to continue doing what I have been doing so far: paying close attention to what is needed on the ground and addressing issues step by step, within what is realistically possible.

In particular, for my work supporting companies through the Route 330 program, I hope to continue serving as a steady bridge between internal teams and external partners so that the program can move forward without interruption. Rather than aiming for dramatic change, I want to stay focused on what is genuinely helpful in practice and carry out my responsibilities with care and a strong sense of accountability.

Keeping JDC and Its Partners Safe and Moving Forward

Kim Jun-yong,
Assistant Manager

Please introduce yourself.

Hello, my name is Kim Jun-yong, and I work as an Assistant Manager on JDC's Safety Management Team. I currently serve as JDC's safety officer, overseeing safety and health management systems across our business sites, coordinating compliance with the Serious Accidents Punishment Act, and supporting safety and health management efforts for our partner companies.

Please describe the key elements and background of your proactive action case.

Through our monthly safety council meetings, I have focused on actively listening to feedback from partner companies and supporting improvements that can be implemented in practice. In parallel, by participating in the Ministry of Employment and Labor's Safety and Health Win-Win Cooperation Program, we were able to contribute to raising safety management standards among our partner companies. I believe my colleagues viewed these efforts positively, as they helped strengthen collaboration with partner companies and ultimately create safer workplaces.

What does this proactive action case mean for JDC?

As is often the case with public institutions, our organization can sometimes feel rigid, and collaboration across departments does not always come easily. Through this experience, however, we were able to show that when teams work together, meaningful results are possible. I believe this helped reinforce the value of cooperation within the organization, and I also hope it contributed to strengthening JDC's image externally in a positive way.

As an Outstanding Proactive Action Award recipient, what would you like to focus on going forward?

I believe individual achievements do not end with one person, but ultimately contribute to the success of the entire organization. Going forward, I hope to continue fostering an environment where everyone takes ownership of their role, works proactively, and learns from one another as we grow together. 🌊

Opening a New Future Led by Youth The 5th Young Leaders Forum

YLF

제5회 영리더스포럼, 제주

The 5th Young Leaders Forum, Jeju

2025. 11. 27^목 - 28^금

제주한라대학교 한라컨벤션센터

격변의 시대,
청년이 준비하는 미래

Hosted by the Jeju Free International City Development Center (JDC), the 5th Young Leaders Forum Jeju concluded successfully as the largest edition to date. The forum drew attention for its youth-led approach, with young participants taking the lead from planning through execution and stepping forward not as passive attendees, but as active drivers of change.

A Major Transformation: From Passive Audiences to Youth-Led Planning

Held over two days from November 27 to 28 at the Halla Convention Center of Jeju Halla University, this year's forum embraced a bold shift under the theme "The Future Prepared by Youth in a Time of Change." Moving away from a top-down format led solely by JDC, the forum introduced a youth planning committee and entrusted young participants with every stage of the process, from selecting the theme and inviting speakers to designing the sessions themselves.

A key highlight was the introduction of youth facilitators, who were selected through an open call and went on to lead idea-based discussion workshops. This approach transformed participants from passive listeners into active contributors. In addition, the forum launched its first-ever open call for youth speakers, attracting 186 applicants. Eight speakers were ultimately selected, each sharing insights drawn from real-world experience and proposing ideas for change that resonated across generations.

On Site at the 5th Young Leaders Forum

Strong Engagement, Measured Impact

The forum's impact was reflected clearly in the numbers. Total online and on-site participation reached 5,268, more than tripling from the previous year, while views of digital promotional content rose to 37,000, a sixteenfold increase year over year. Participant satisfaction reached 94.01 points, underscoring both quantitative growth and a marked improvement in overall quality.

The program featured in-depth discussions on issues facing today's youth, including AI, the climate crisis, and global leadership.

Highlights included a keynote address by Park Tae-woong, Chair of the Nokseo Forum, along with sessions led by internationally renowned author Mandip Rai, Professor Moon Chung-in of Yonsei University, and Kang Keum-sil, Co-Representative of Earth and People. In addition, the newly introduced YLF Young Leader Awards have emerged as a platform for identifying and supporting young leaders who share Jeju's values with the global community.

The 5th Young Leaders Forum group photo

Turning Youth Voices into Policy Action

Moving beyond a one-time event, JDC has established a collaborative framework with the Jeju Provincial Government's Youth Participation Team to ensure that ideas raised at the forum can be reflected in actual policy discussions. Through this partnership, the voices of young participants are no longer limited to the stage, but are carried forward into concrete policy pathways.

JDC has also partnered with the global content platform "Sebasi (15 Minutes That Change the World)" to share forum content with a wider international audience, expanding the vision of Jeju's youth onto the global stage. By speaking in their own voices and presenting ideas rooted in lived experience, today's discussions are positioned to become meaningful action tomorrow.

Looking ahead, JDC plans to formalize the YLF Young Leader Awards alumni network, creating a sustainable platform for ongoing connection and collaboration among young leaders.

Youth Voices at the Heart of the Forum

**Joo Jeong-pyo,
Assistant Manager,
Future Business Office, JDC**

Could you briefly introduce yourself?

Hello, my name is Joo Jeong-pyo, and I work as an Assistant Manager in JDC's Future Business Office. I was involved in organizing this year's Young Leaders Forum, which concluded with an unprecedented level of energy and engagement from young participants.

It was an incredibly rewarding experience for our team as well, and one that allowed us to learn and grow alongside the youth who took part in the forum.

What role did you play in this year's JDC Young Leaders Forum?

I was involved in the entire process of the forum, from overall planning through on-site execution. This year, in particular, we focused on transforming the forum into a fully youth-led initiative, building on JDC's past experience while taking a completely new approach.

To make that possible, we established a Youth Planning Committee and held open calls for youth speakers and youth facilitators. My role was to support them behind the scenes, so they could take the lead in shaping discussions and driving the forum as its main participants.

The 5th Young Leaders Forum Youth Take the Stage — A Q&A Concert

**As the person in charge,
what did you consider most important about
this year's JDC Young Leaders Forum?**

What mattered most to us was shifting young participants from being passive audience members to becoming active voices on stage. Our goal was not simply for them to attend and listen, but to give them opportunities to fully express their potential and experience real personal growth.

To support this, we introduced a Youth Speaker Open Call, allowing young participants to step onto the stage and present their own ideas. The response was overwhelming, with a 23-to-1 application ratio, which clearly reflected their strong desire to take part in shaping the forum. By placing youth voices at the center of the program, we believe the forum gained a new level of depth and quality.

Looking ahead, which elements from this year's forum would you like to carry forward into future JDC Young Leaders Forums?

We would like to further strengthen the sustainable foundation we built this year. There are two key areas we hope to build on.

First, we want to reinforce the policy pipeline linked to the Jeju Youth Roundtable, so that the ideas raised during the forum do not end there, but continue to move forward into meaningful policy discussions.

Second, we aim to activate the YLF Alumni Network, allowing young participants to stay connected, exchange ideas, and continue growing even after the forum concludes. Ultimately, we hope the Young Leaders Forum will go beyond a one-time event and establish itself as a platform where young people, centered around JDC, can connect with the world and continue developing their potential as future global leaders.

JDC MAGAZINE
JANUARY 2026

The Jeju Free International City Development Center (JDC) publishes its digital magazine **Dream of Jeju** to share Jeju’s vision as a Free International City and work together toward its realization. This January issue returns with the theme “A New Year Beginning with the Spirit of Hallasan” and marks JDC’s energetic start to the new year. It features the organization’s New Year’s greeting, the Young Leaders Forum highlighting the future being shaped by young leaders, the launch of the Citizen Innovation Group that will help drive JDC’s transformation, and the inauguration of Global Friends.

As a public enterprise under the Ministry of Land, Infrastructure and Transport, JDC remains committed to enhancing the quality and completeness of its core projects in tourism, education, healthcare, and advanced industries, while identifying new growth engines to strengthen the foundation for Jeju’s future development.

Naver Blog

**What role did you play in this year's
JDC Young Leaders Forum?**

I took part in the forum as a youth facilitator. During the youth policy idea sessions, my role was to help participants feel comfortable sharing their thoughts freely and engaging in discussions while respecting different perspectives.

I focused on encouraging open communication and making sure that voices from young people with diverse backgrounds were heard throughout the conversation. Through this experience, I was struck by how thoughtful and genuinely engaged many participants were, particularly when it came to social issues and public policy.

**What stood out to you most through
the JDC Young Leaders Forum?**

What impressed me most was how topics like AI were discussed not just as technological or industrial issues, but as policy questions closely connected to the lives of young people and the long-term sustainability of the region. Participants spoke honestly about their concerns over the changes AI may bring, while also sharing how it could help address local challenges and create new opportunities.

I found it especially meaningful to see individual experiences come together and gradually form a shared direction. As different perspectives complemented one another, ideas became more refined and practical.

If spaces for this kind of open dialogue continue, I believe youth policy can develop in ways that are both more realistic and more empathetic.

How would you like the JDC Young Leaders Forum to be remembered by young people?

I hope this forum is remembered as a warm and reassuring experience. During the forum, one youth speaker shared a reflection on the Korean expression meaning “it’s okay,” explaining that it carries the idea that nothing we do is without reason, and that our choices are never in vain. That message stayed with me.

In that sense, I hope this forum helped young people recognize that their concerns and decisions all had meaning, and that it became a space where they could offer one another comfort, encouragement, and the courage to move forward.

A Chance to Reflect Calmly Amid Rapid Change

**Shin Yoon-ah,
Youth Intern,
Future Business Office**

Could you briefly introduce yourself?

Hello, my name is Shin Yoon-ah, and I am currently working as an intern in the Future Business Office at the Jeju Free International City Development Center (JDC). This year's forum was held under the theme "The Future Prepared by Youth in a Time of Change," and I joined because I wanted to listen firsthand to how young people view the future and think more deeply about how we can prepare for it from a youth perspective.

What role did you play in this year's

JDC Young Leaders Forum?

I attended the forum as a general participant, taking part in keynote talks by invited leaders as well as youth-led presentation sessions.

I also joined the discussion programs that followed, which allowed participants to actively engage rather than simply listen.

With interactive formats such as the Q&A concert and idea-based discussions woven throughout the program, the forum created a natural space for open exchange. Through these conversations, I was able to broaden my perspective and share diverse viewpoints with other participants.

What stood out to you most through

this year's JDC Young Leaders Forum?

The forum gave me an opportunity to reflect more deeply on the mindset we need in the age of AI. One moment that stood out was when Park Tae-woong spoke about how the core strength in the AI era lies not in finding answers quickly, but in the ability to ask good questions. He emphasized the importance of seeing ourselves as responsible questioners and continuously building broad knowledge and life experience.

Professor Kim Hyun-chul delivers a keynote address at the JDC Young Leaders Forum

Another perspective that resonated with me came from Professor Kim Hyun-chul, who discussed how algorithms can reinforce confirmation bias by repeatedly exposing us to similar viewpoints. He stressed that engaging with people from diverse backgrounds and communicating through empathy and consideration is essential to overcoming this tendency.

Together, these insights made me realize that in the AI era, it is not enough to rely on fast answers alone. We need to keep expanding our perspectives through learning and real human interaction, especially by stepping outside familiar spaces and meeting people with different experiences.

At a time when I had begun to feel that AI might be reducing opportunities for independent thinking, this forum reminded me of the importance of maintaining a thoughtful and healthy approach to how we think.

**What kind of memory would you like the JDC
Young Leaders Forum to leave for young people?**

I hope the JDC Young Leaders Forum is remembered as a moment when young people were able to pause and look calmly at a rapidly changing world. These days, change often feels like waves coming one after another, making it hard to find direction. Through this forum, however, listening to the speakers gave me space to slow down and reflect on what we should be preparing for amid that change.

What stayed with me most was the shared message that the concerns we face today may themselves be part of preparing for a larger future. That perspective gave me a small but meaningful sense of wisdom and courage as I think about the path ahead. I hope other young people remember this forum as a chance to briefly step back, reflect on themselves, and think more deeply about where they are headed. 🌊

A New Milestone in the Commercialization of Autonomous Driving

An autonomous driving pilot service has been successfully launched at the Jeju Advanced Science and Technology Park, demonstrating the real-world potential of next-generation transportation. By introducing an advanced on-demand transit system to areas underserved by public transportation, the initiative has improved mobility and satisfaction for tenant companies and local residents alike, marking a significant step forward in the commercialization of autonomous driving.

The 5th Young Leaders Forum group photo

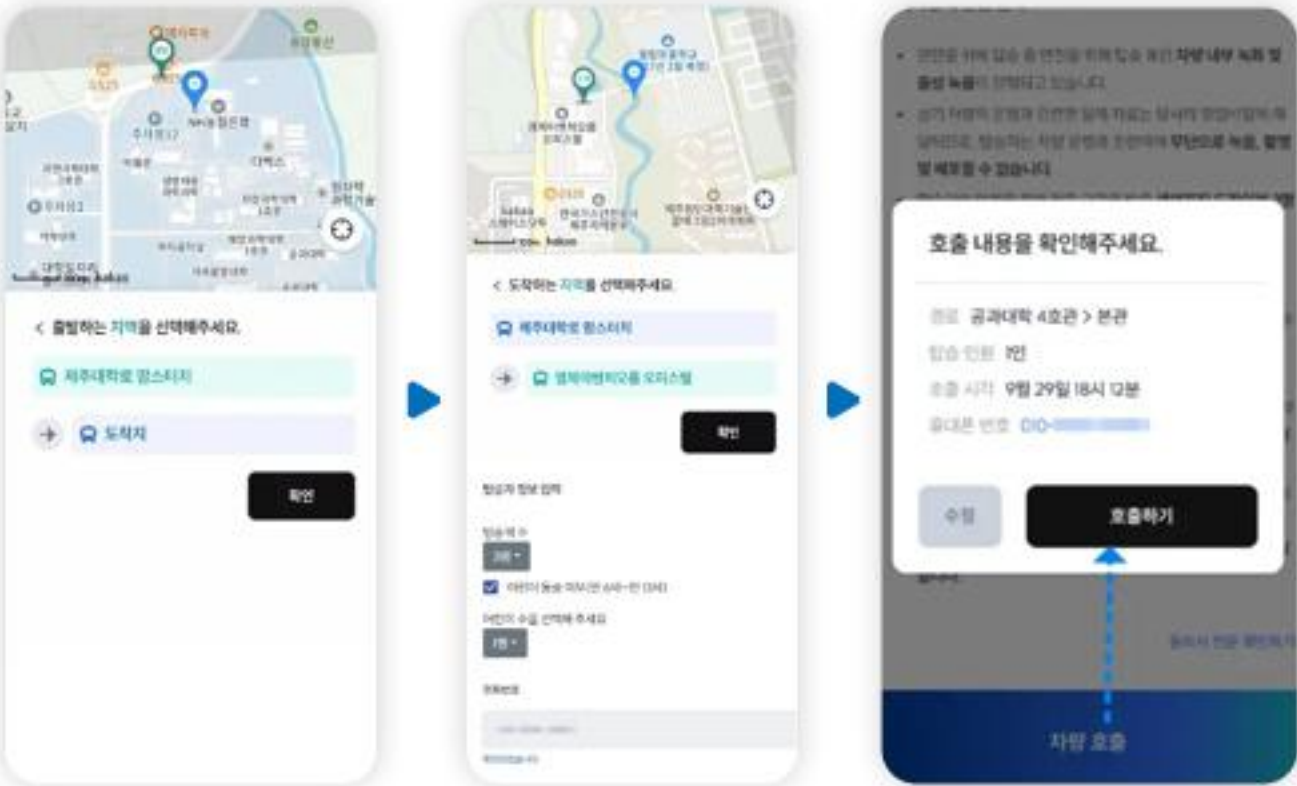

Turning Youth Voices into Policy Action

Moving beyond a one-time event, JDC has established a collaborative framework with the Jeju Provincial Government's Youth Participation Team to ensure that ideas raised at the forum can be reflected in actual policy discussions. Through this partnership, the voices of young participants are no longer limited to the stage, but are carried forward into concrete policy pathways.

Looking ahead, JDC plans to formalize the YLF Young Leader Awards alumni network, creating a sustainable platform for ongoing connection and collaboration among young leaders.

How to Book Autonomous Driving Demo Service

STEP 1

Select Departure Point

The system automatically selects the nearest available pick-up point from your location where service is available.

STEP 2

Select Destination (same method as departure point), then scroll down to enter passenger information.

STEP 3

Once the 'Vehicle Search' button is activated, click the button and finalize by clicking 'Request Ride'!

Note: Ride cannot be requested when other passengers are using the vehicle or during system maintenance hours.

The service proved particularly effective as an on-demand mobility solution for short-to-mid-range trips that are inconvenient by taxi yet too far to walk. Usage data showed that students accounted for 52.4 percent of riders, followed by employees of companies located in the Advanced Science and Technology Park at 29.4 percent, and park residents at 9.5 percent, underscoring its ability to meet the transportation needs of a diverse user base.

In 2024, RideFlux and Kakao Mobility jointly operated four routes within the Advanced Science and Technology Park. These included a 3.1-kilometer loop around Jeju National University, a 4.7-kilometer loop within the science park, feeder routes ranging from 5.4 to 5.6 kilometers, and trunk routes spanning 3.7 to 3.8 kilometers, forming an integrated local mobility network.

Jeju Leading the Way in the Commercialization of Autonomous Driving

JDC's autonomous driving pilot goes beyond technical validation, presenting a transportation solution designed for real-world use. By introducing advanced on-demand mobility services to areas underserved by public transportation, the initiative aims to improve everyday mobility for tenant companies and local residents alike. These efforts are already strengthening the competitiveness of the Jeju Advanced Science and Technology Park. The autonomous driving service eases mobility challenges within the complex, supports commuting and work-related travel for employees and students, and enhances overall quality of life for residents, contributing to broader regional development.

Survey results offer a clear picture of why the service resonates with users. At its core, the initiative addresses the last-mile gap: trips that are inconvenient by taxi yet too far to walk. This highlights the potential role of autonomous driving as a practical link between public transit and personal mobility.

Looking ahead, JDC plans to continue operating and refining the service, further positioning Jeju as a leading region for autonomous driving technology. Building on this proven model where advanced technology meets local needs, the initiative points the way toward the future of mobility in the Jeju Free International City. 🌊

Bringing Jeju to the World, and the World to Jeju

Jeju Free International City Development Center (JDC) held a launch ceremony on November 21 at its headquarters to mark the start of activities for the fourth cohort of its global supporter group, JDC Global Friends. Designed as a collaborative model that brings together international and Korean participants on a single team, the fourth cohort combines professional expertise with global perspectives to serve as a bridge between Jeju and the world, helping share the island's distinctive character with a global audience.

International and Korean Collaboration Driving Innovation in Content Expertise

JDC Global Friends is a global supporter program launched by the Jeju Free International City Development Center (JDC) to raise international awareness of the Jeju Free International City and promote both JDC and Jeju to a global audience. The fourth cohort was designed to address content quality limitations identified during the previous cohort and to significantly strengthen professional expertise. The most notable innovation lies in the team structure itself. Korean mentors with strong expertise in local social media trends and video production were selected to work alongside international supporters as part of the same team. Each team consists of three international participants and one Korean mentor, a four-member model that combines fresh global perspectives with local expertise to create a strong foundation for producing high-quality content.

Sixteen Global Talents from Nine Countries Come Together in Jeju

To encourage active participation and on-the-ground engagement, the fourth cohort was selected exclusively from residents of Jeju. A total of 16 participants were chosen, including 12 international members from nine countries including the United States, France, Canada, Pakistan, Singapore, Nepal, the Philippines, Uzbekistan, and the Netherlands, along with four Korean participants.

The group will be active for approximately seven months through June 2026, producing content across four thematic areas: tourism, policy research, K-culture, and everyday life in Jeju.

Launch Ceremony for the 4th JDC Global Friends Cohort

In particular, the cohort is expected to reinterpret the growing global influence of K-culture through a Jeju-centered lens and share it with international audiences through content such as Jeju food features and K-pop challenge videos.

Showcasing Jeju Through Multi-Layered Activities

The launch ceremony featured the presentation of appointment certificates, along with specialized training sessions led by professional instructors to strengthen content production skills. Members of the fourth Global Friends cohort will take part in JDC's YouTube channel by creating experience-based and reporter-style video content that highlights Jeju's unique appeal.

Through team-based activities, participants will plan and produce content focused on tourism promotion, policy research, K-culture, and the everyday experiences of international residents living in Jeju. In addition, they will collaborate across teams to develop joint content

↑
Launch Ceremony for the 4th JDC Global Friends Cohort

projects, while further enhancing video quality and professional standards through ongoing content production training and branding workshops.

Bringing Jeju to the World Through a Global Perspective

Jeju Free International City Development Center (JDC) plans to actively leverage outstanding content produced by the Global Friends cohort across its official social media channels and other international promotional platforms. Outstanding participants will also be recognized at the conclusion of the program.

By combining international perspectives with local expertise, the fourth Global Friends cohort represents a collaborative model with strong practical impact. The group's polished and trend-aware content is expected to further strengthen Jeju's global presence while playing a meaningful role in sharing the island's distinctive appeal, including K-culture, with audiences around the world. 🌐

JDC Global Friends 4th Cohort Activities

Program Overview

Participants

16^{total}

12 international participants
+ 4 Korean participants

Program Period

November 2025
to June 2026

approximately 7 months

Team Structure

Teams of 4

3 international participants
+ 1 Korean participant per team

Participating Countries

a total of 9 countries

The United States, France, Canada,
Pakistan, Singapore, Nepal, the Philippines,
Uzbekistan, and the Netherlands

Key Activities

Participation in JDC YouTube content

experience-based and reporter-style videos

Team-based themed content production

tourism, policy research, K-culture, and life in Jeju

Collaborative content with other teams

3 times during activity period

Professional training and workshops

video production and branding

Content Themes

Tourism

Experiencing major tourist destinations across Jeju

Policy Research

Promoting JDC initiatives and introducing Jeju's global development policies

K-Culture

InShowcasing diverse aspects of Korean culture (Jeju food mukbang, K-pop challenges, etc.)

Jeju Life

Vlogs featuring everyday life content from the perspective of international residents

Open Themes

Team-selected free topics

A New Year, A Fresh Reset for Your Skin

Rejuran Cosmetics, Now Available at JDC Duty Free

January is a time to close one chapter and prepare for a new beginning. It is also a moment for your skin to start fresh.

Backed by 20 years of expertise in skin regeneration developed through professional aesthetic treatments, Rejuran now brings that experience into everyday skincare. Enjoy at-home care inspired by treatments once available only in dermatology clinics.

From Dermatological Treatments to Daily Care: Rejuran Cosmetics

Developed through regenerative medicine research by the biopharmaceutical company PharmaResearch Co., Ltd., Rejuran Cosmetics captures the core essence of Rejuran Healer treatments. Harmful ingredients are strictly excluded, with a focus solely on natural ingredients for skin health. Rejuran defines true anti-aging as restoring the skin's natural rhythm, the 28-day regeneration cycle.

① Turnover Ampoule 50 ml

What if you could notice your skin changing little by little each morning when you look in the mirror? c-PDRN, a key ingredient of Rejuran Cosmetics with a focus on regeneration and anti-aging, helps restore the skin's natural 28-day turnover cycle, the period in which the skin regains its vitality on its own.

Duty Free Price

85,000 KRW

② Dual Effect Ampoule 50 ml

When you look in the mirror, fine lines around the eyes, nasolabial folds, and deepened lines on the forehead can quietly reveal the passage of time. This ampoule addresses those visible signs by delivering elasticity from deep within the skin. Clinically tested results show that, after just one week of use, six types of wrinkles become visibly less pronounced.

Duty Free Price

86,400 KRW

③ Triple Radiance Ampoule 50 ml

Formulated with 5,000 ppm of c-PDRN, this ampoule helps reduce melanin buildup and improve pigmentation-related aging, enhancing three key elements at once: skin tone, texture, and radiance. The result is skin that looks luminous under any lighting and from every angle.

Duty Free Price

87,750 KRW

④ Turnover Cream Enhanced 50 ml

Formulated with 2,000 ppm of c-PDRN, this cream helps strengthen the skin barrier and supports the skin's natural recovery process while you sleep. By morning, you can feel a calmer, more comfortable skin condition.

Duty Free Price

33,000 KRW

⑤ Active Cream Enhanced 50 ml

Formulated with 2,000 ppm of c-PDRN and a three-step solution of amino acids, peptides, and collagen, this cream helps lift the skin from within. Facial contours appear more defined, while the skin feels firmer and more resilient.

Duty Free Price

35,000 KRW

Connecting Lives, Adding Value to People 2025 JDC Ieum Jobs Performance Sharing Event

참여자 한분 한분의 노력 덕분에
지역사회에 실질적 변화를 만들어

On November 26, the 2025 JDC Ieum Jobs (a program that connects participants to sustainable employment) Performance Sharing Event was held at Ecoland Hotel. The event brought together approximately 200 participants and representatives from partner organizations to share outcomes and reflect on the journeys of participants who have grown beyond employment into professionals.

〈Three leum Connections That Elevated Jeju’s Value〉

**Environmental and Ecological Conservation Team
: Connecting the Environment**

Guardians of nature protecting oreums, gotjawal forests, and coastal areas

Safety guidance, trail management, environmental cleanup, removal of harmful plants, environmental campaigns

**Sharing and Learning Support Team
: Connecting People**

A senior care support team focused on planning healthy aging

Walking programs, exercise instruction, cognitive activities, employment counseling, welfare facility support

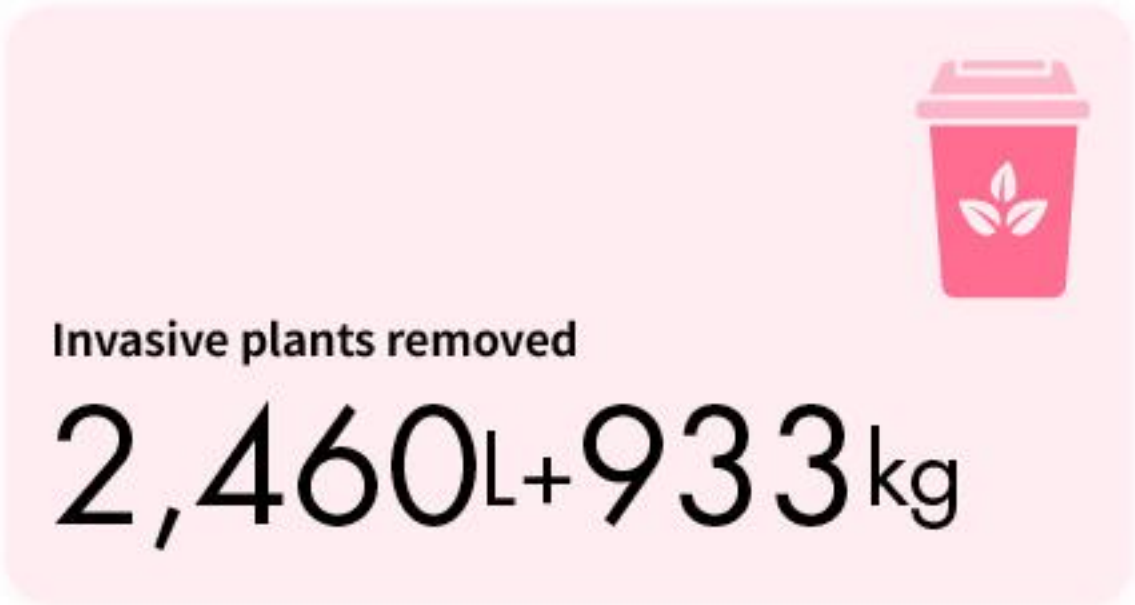

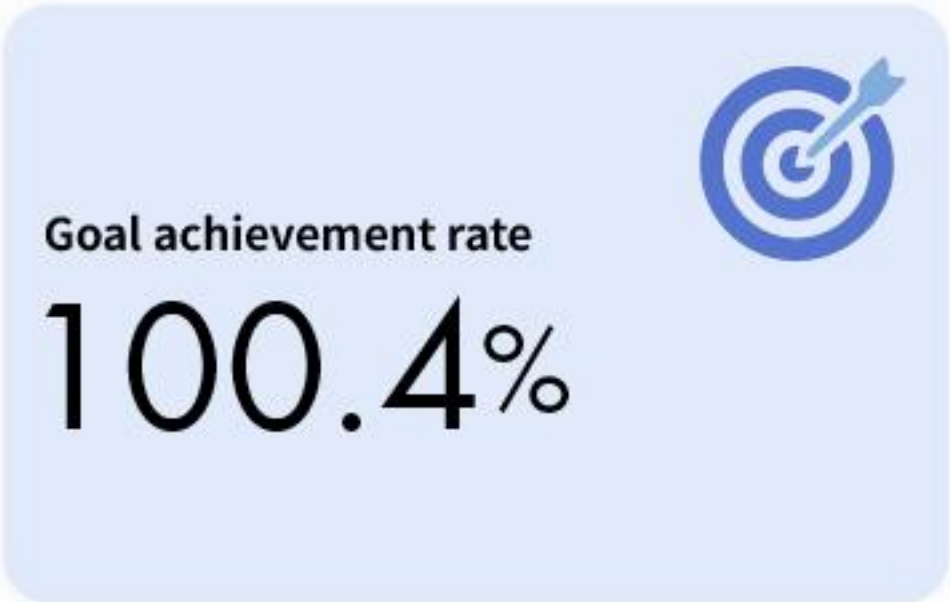

**Connecting Supporters
: Connecting Value**

A digital promotion team documenting and sharing Jeju’s environment and culture

Social media content creation, on-site documentation, project promotion, archiving, regional promotion

〈2025 Achievements by the Numbers〉

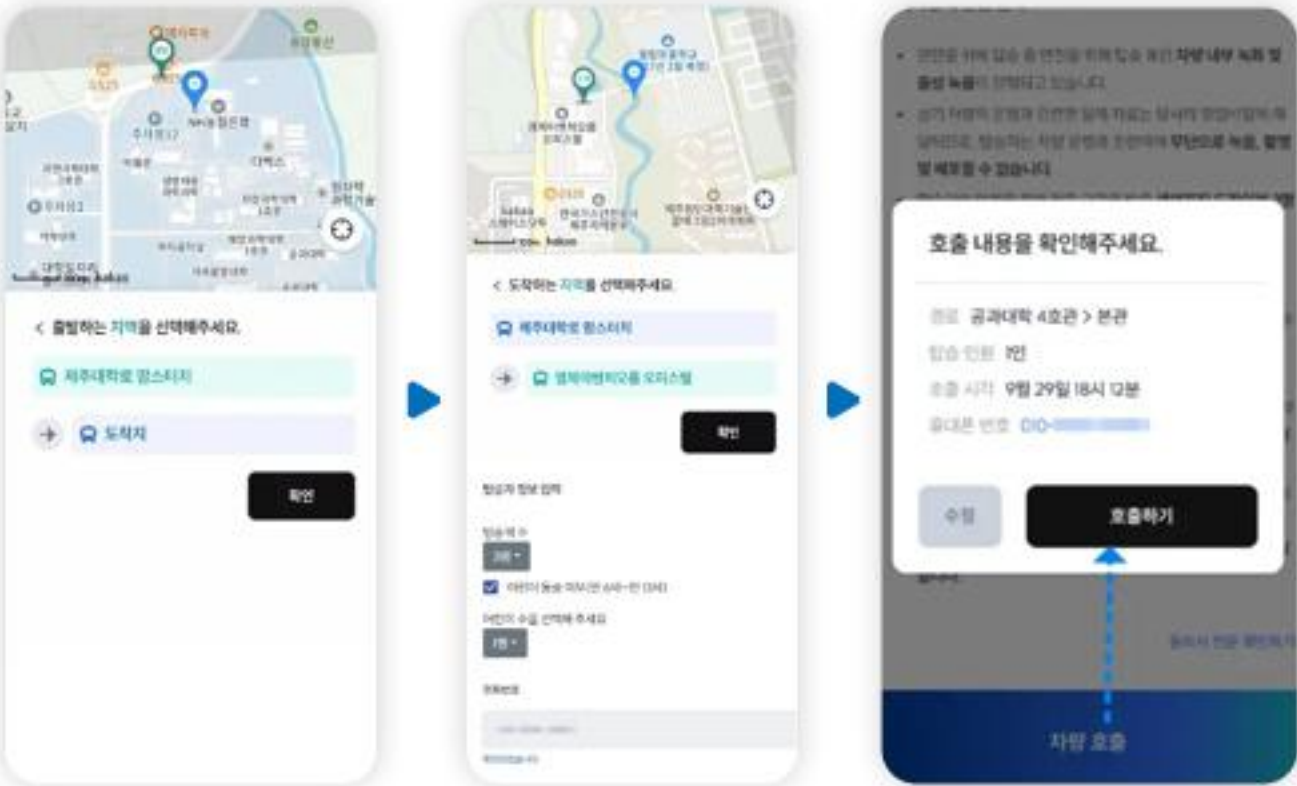

*Accumulated achievements as of the end of October 2025

Growing Beyond Jobs to Become Professionals

In Part 1 of the 2025 JDC Ieum Jobs Performance Sharing Event, project performance reports were presented, along with the awarding of plaques of appreciation to outstanding participants. The most significant outcome of the 2025 Ieum Jobs program was that all participants obtained professional certifications, gaining new areas of expertise. A total of 251 participants achieved a 100 percent certification rate, including 96 from the Neuyeong Nayeong Welfare Community, 111 from the Jeju Senior Club, and 44 from the Seogwipo Senior Club. Certifications were obtained across a range of fields, including Forest Resource Manager, Environmental Ecology Specialist, Walking Instructor, Park Golf Specialist, and Social Media Marketing Specialist. Meanwhile, the Sharing and Learning Support Team transitioned from passive recipients of welfare services to active providers who share knowledge and skills. The team directly operated a total of 505 educational programs, delivering professional education to 5,535 local residents.

Programs developed directly by participants, such as Decorating My Name and Origami Exhibition, received strong responses at program sites. Facilities including Ara Nursing Home requested an increase in participant numbers from six to seven, while the Hyosim and Hwabuk areas requested an expansion of program frequency from three times per week to four.

How to Book Autonomous Driving Demo Service

STEP 1

Select Departure Point

The system automatically selects the nearest available pick-up point from your location where service is available.

STEP 2

Select Destination (same method as departure point), then scroll down to enter passenger information.

STEP 3

Once the 'Vehicle Search' button is activated, click the button and finalize by clicking 'Request Ride'!

Note: Ride cannot be requested when other passengers are using the vehicle or during system maintenance hours.

The service proved particularly effective as an on-demand mobility solution for short-to-mid-range trips that are inconvenient by taxi yet too far to walk. Usage data showed that students accounted for 52.4 percent of riders, followed by employees of companies located in the Advanced Science and Technology Park at 29.4 percent, and park residents at 9.5 percent, underscoring its ability to meet the transportation needs of a diverse user base.

In 2024, RideFlux and Kakao Mobility jointly operated four routes within the Advanced Science and Technology Park. These included a 3.1-kilometer loop around Jeju National University, a 4.7-kilometer loop within the science park, feeder routes ranging from 5.4 to 5.6 kilometers, and trunk routes spanning 3.7 to 3.8 kilometers, forming an integrated local mobility network.

Outstanding Participant Awards

Customized walking instruction for people with chronic conditions, along with one-on-one coaching in park golf and gateball, received positive feedback.

The Seogwipo Senior Club collected 1,450 kilograms of marine waste through joint plogging activities and donated 880,000 won to a conservation fund through gotjawal walking plogging. After all members of the park golf team obtained instructor certifications, they conducted expertise-based coaching and achieved the highest level of user satisfaction.

The Ieum Supporters produced high-quality promotional content through intergenerational collaboration between senior participants and younger participants.

At the performance sharing event, these contributions were recognized with plaques of appreciation awarded to 13 outstanding participants across six categories: Eco Curator and Blue Guard, Brain Care Coach, Active Life Coach, Walking Health Master, Digital Promotion Marketer, and Career Bridge Maker.

2026: Beyond Stepping Stones Toward a New Phase

The outcomes of the 2025 JDC Ieum Jobs program will lead to the establishment of new project teams under the Ministry of Health and Welfare's Senior Employment Program in 2026. The Jeju Senior Club will launch the Vulnerable Groups Public Interest Support Team, the Seogwipo Senior Club will establish the Park Golf Manager Team, and the Neuyeong Nayeong Welfare Community will create the Sharing and Learning Support Team. This demonstrates how the JDC Ieum Jobs program functions as a bridge employment model that goes beyond short-term jobs and encourages continued social participation through a virtuous cycle.

In Part 2 of the performance sharing event, the Gotjawal Healing Walk program, organized by the Sharing and Learning Support Team, was held. Along the gotjawal forest trail at Ecoland Theme Park, participants shared the expertise they had acquired with their peers and spent time in communication and reflection in Jeju's autumn forest. In 2026, the JDC Ieum Jobs program is scheduled to continue with its 11th phase, supported by a total budget of 1.34 billion won and involving approximately 230 participants. Going forward, the program will continue to build an employment ecosystem that connects the future of Jeju residents with regional value, while pursuing economic self-reliance, capacity building, social contribution, and sustainability. 🌿

The First Step Toward Innovation Built with Citizens

JDC has launched the 2025 JDC Citizen Participation Innovation Group for Implementing the New Government's National Policy Agenda, marking a new phase of innovation carried out in partnership with local residents. The initiative introduces a participatory innovation model in Jeju in which citizens' voices are directly incorporated from the policy design stage within a public institution.

Second Regular Meeting of the Citizen Participation Innovation Group

A Virtuous Cycle Structure Where Citizen Ideas Become Policy

The Citizen Participation Innovation Group carried out its activities through three regular meetings held between September and December. In October, a Citizen Ideathon was organized, featuring group discussions on AI, safety, innovation, and jobs. With mentoring support from advisory members, participants developed creative ideas with strong potential for practical implementation. At the third meeting in November, the group reviewed the organization's best practices (BP) and shared activity outcomes, while examining how the ideas identified could be linked to new projects in the following year.

What stands out in particular is that the initiative goes beyond simple opinion gathering. Outstanding proposals are submitted as agenda

Third Regular Meeting of the Citizen Participation Innovation Group

items to the Management Innovation Committee and are reflected in JDC's innovation plans in practice.

Selected ideas from the Citizen Participation Innovation Group are reviewed for adoption as new JDC projects in the following year, forming a virtuous cycle in which citizen input directly informs policy. Key activities included identifying innovation initiatives related to the new government's national policy agenda and proposing implementation measures. Participants also offered improvement ideas from a user perspective for JDC's major projects, including the English Education City, Advanced Science and Technology Park, Healthcare Town, Shinhwa History Park, and designated duty-free shops. In addition, the group contributed to building shared understanding through the dissemination of the institution's value framework and actively participated in identifying ideas for new projects in the coming year.

Building Jeju's Future Together

Through the operation of the Citizen Participation Innovation Group, JDC seeks to directly gather user-centered policy needs and establish a three-stage innovation model

: citizen participation → task identification and action planning
→ on-site implementation and performance review.

This approach reflects JDC's commitment to building a participatory innovation ecosystem in which residents' perspectives are incorporated from the policy design stage.

The Citizen Participation Innovation Group is not merely a forum for collecting opinions. It represents a new model of collaborative governance in which citizens themselves become active agents of institutional innovation and jointly shape Jeju's future.

Over 100 days of activity, the innovative ideas generated through this process have helped outline a renewed vision for Jeju's tomorrow.

JDC's Shared Growth Begins with Basic Safety

The JDC Dream Sharing Volunteer Corps delivered fire safety kits to traditional markets and small business owners vulnerable to winter fires. The initiative was launched in response to a series of recent fire incidents in Jeju and reflects JDC's approach to shared growth, which places close attention on gaps in safety and welfare support.

Staying Safe This Winter with Fire Safety Kits

On December 19, Hallim Maeil Market was filled with activity as members of the JDC Dream Sharing Volunteer Corps carried out a fire safety support initiative. The effort was part of the Fire Safety Kit Support Program for Small Businesses, designed to strengthen fire preparedness for small business owners and traditional markets during the winter season.

Since November, a series of fires have occurred across Jeju, including incidents at shops in Dongmun Market, an open storage yard in the Topyeong Industrial Complex, and a resource circulation management facility in Nohyeong-dong. While no casualties were reported, the resulting property damage is believed to have added to the operational burden on affected businesses amid an ongoing economic slowdown. In response, the JDC Dream Sharing Volunteer Corps launched a year-end initiative targeting small-scale businesses and traditional market vendors considered most vulnerable to fire risks.

The fire safety kits distributed through the program were composed of six items, selected with careful consideration for fire prevention, initial response, and safe evacuation. These included safety power strips with automatic fire-extinguishing functions, automatic fire-extinguishing patches for outlets and power strips, manual fire extinguishers, spray-type fire extinguishers, emergency rescue handkerchiefs, and portable emergency lights.

Members of the JDC Dream Sharing Volunteer Corps visited each shop in person to deliver the kits, explaining how to use each item and providing guidance on appropriate response measures in the event of a fire.

Kim Seok-ju, Assistant Manager of JDC's Shared Growth Cooperation Team, who participated in the activity, said, "After hearing repeated reports of fires occurring across Jeju, we became increasingly concerned about the safety of traditional markets and small business owners." He added, "As a public institution working alongside the local community, JDC will continue its efforts to strengthen essential safety measures that may not always be visible but are critically important."

Strengthening the Community Safety Net

JDC made concerted efforts to identify support recipients in areas vulnerable to gaps in safety and welfare. It signed an agreement with the Jeju Special Self-Governing Province Small Business

Management Support Center, headed by Director Ko Haeng-beom, to support businesses operating in fire-prone industries and traditional markets. The initiative was carried out in cooperation with the Jeju Special Self-Governing Province Small Business Management Support Center and the Jeju Special Self-Governing Province Merchants' Association, providing support to 48 shops at Hallim Maeil Market and 22 shops in the Seogwipo Central Shopping District.

Meanwhile, since 2021, JDC has maintained an annual fire prevention partnership with the Jeju Fire Department under the Support Program for Creating Safe Living Environments for Vulnerable Groups. As part of these ongoing efforts, JDC delivered fire extinguishers and fire detectors to elderly households in Hwangsapyeong Village on December 17, continuing its commitment to community safety.

Going forward, JDC plans to continue fulfilling its role as a public institution that works closest to everyday life in the region, safeguarding the safety of local residents and small business owners alongside the community. 🍂

JDC NEWS & TOPICS

JDC Obtains ISO 45001 Certification

Internationally Compliant Occupational Health and Safety Management System

JDC announced that it has obtained ISO 45001 certification after establishing an organization-wide occupational health and safety management system.

ISO 45001 is an international standard set by the International Organization for Standardization (ISO) to systematically manage workplace health and safety risks and strengthen the prevention of industrial accidents.

The certification confirms that JDC's overall operations meet international standards for occupational health and safety management. JDC has implemented a range of measures, including workplace risk analysis and improvement, the establishment of safety and health objectives and management systems, strengthened safety support for partner companies, emergency response drills, safety culture campaigns, and expanded safety

training for all employees.

Through this certification, JDC expects to manage on-site risks more systematically and further enhance cooperative safety management with partner companies and the local community.

Reader Feedback

Dream of Jeju December 2025 Issue

Ha *rin

I enjoy being able to see the many different sides of Jeju.

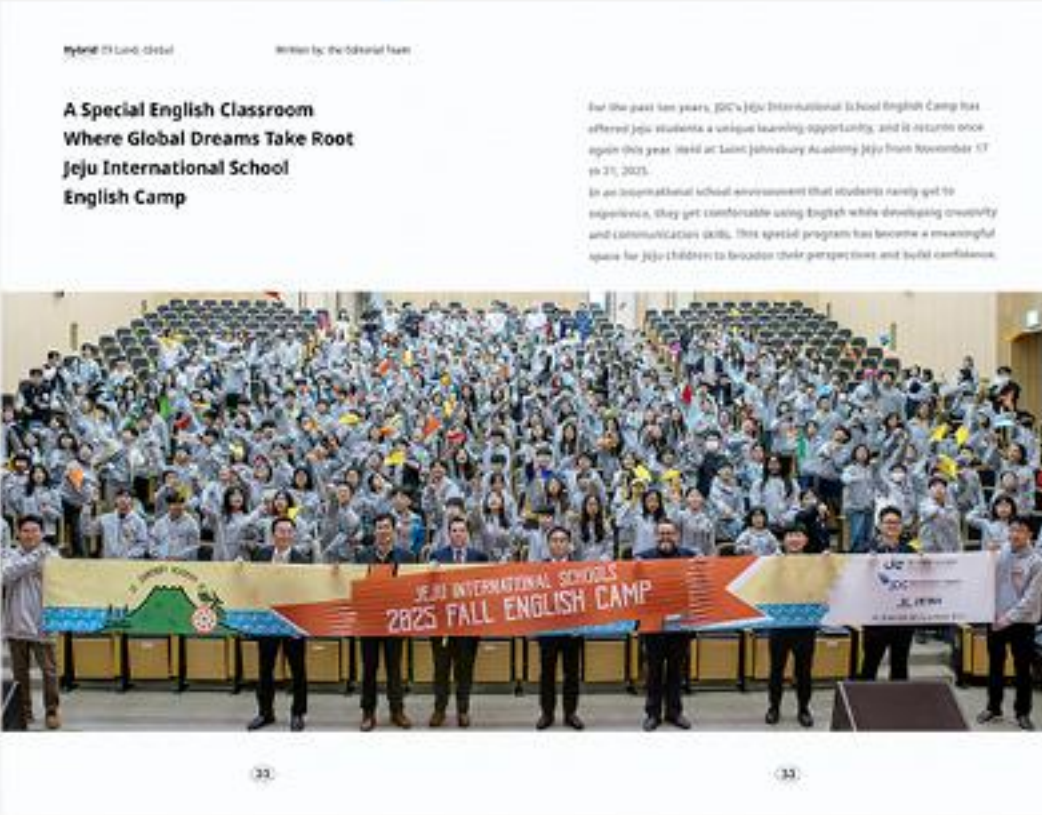

Lee *im

Knowing that this issue marks the final webzine of the year makes me feel a little wistful, and I found myself turning each page more slowly and carefully. Looking back, spending the year with Dream of Jeju allowed me to catch vivid glimpses of a clean and beautiful Jeju, and a future that feels more hopeful and brighter than today. I sincerely hope that next year's issues will continue to be just as rich and meaningful, and be remembered as a webzine warmly loved by its readers. :)

Reading the article on the Jeju International School English Camp made me realize that Jeju is truly emerging as Korea's landmark for nurturing future global leaders.

I hope that Jeju will continue to grow as a representative international city of Korea, supported by greater opportunities and benefits, and earn the love of people around the world as a leading global city.

What did you think of the January issue of Dream of Jeju? We'd love to hear your thoughts! Readers who share their feedback will receive a small gift through a mobile gift certificate. We look forward to your participation.

Keeping People Safe,
Keeping Jeju Safe

Creating a better Jeju begins when people and technology come together in the field. After the strong commitment to preventing industrial accidents was affirmed at the Cabinet meeting on July 5, 2025, JDC has been working to prevent workplace accidents by applying advanced technology and building a people-centered management system, helping spread the importance of safety across the island.

60

Messages Delivered Through Safety Campaign Videos

JDC has begun producing public safety campaign videos to share the message that "safety is the foundation of a sustainable tomorrow." The five videos, scheduled for completion in mid-November, are created not by listing instructions but by using a storytelling format that connects everyday situations with safety practices in a way that feels seamless and relatable.

Two main videos deliver JDC's core message that safety is the organization's top priority, while three site-specific videos highlight actual safety practices at the Second Jeju Advanced Science and Technology Park, the Jeju Aerospace Museum, and the JDC Duty-Free Shop.

JDC Public Safety Campaign Video

61

Jang *seon

60p

I was pleased to learn that JDC is introducing advanced technologies alongside people-centered management systems to prevent industrial accidents. Safety is a fundamental right for everyone, and creating a safe environment feels especially important in a place as beautiful as Jeju. In particular, the safety campaign videos showcasing safer construction sites and shopping environments are likely to leave a positive impression on many viewers. I am confident that these efforts will help make Jeju an even safer and better place to live.

Introducing Social Economy Enterprises
Partnering with JDC Selected for
The 2025 JDC Jeju Province Resident
Support Program - Social Economy
Enterprise Category

On November 11, the selection process for the 2025 JDC Jeju Province Resident Support Program's Social Economy Enterprise category was completed. The program aims to strengthen the self-sufficiency of outstanding social economy enterprises in Jeju by supporting their commercialization efforts and reinforcing the foundation for creating social value in the community. Here, we introduce ten local social economy enterprises that have earned a new opportunity for growth, supported by JDC's commercialization funding, exhibition opportunities within the Advanced Science and Technology Park, and mentoring provided by the Korea Social Enterprise Promotion Agency.

68

Im *hee

I enjoyed reading the feature on social economy enterprises working alongside JDC. It effectively highlights the qualities such enterprises should strive for, from developing products and services rooted in Jeju's unique local resources, to applying storytelling in promotion and marketing, and collaborating closely with the local community. I hope these efforts continue to grow in 2026, contributing not only to their own success but also to the development of Jeju as a whole.

Garne Co., Ltd. is a social enterprise that supports sustainable ESD-focused tourism in Jeju by offering products and services designed for working travelers, connecting local resources and infrastructure, and creating jobs and opportunities for vulnerable groups. The company currently operates Ode Store locations in Jeju and runs restaurants and cafes under the Farming Baking brand. In addition to selling Garne-branded products, it also offers programs such as "Jeju Workshop Walk and Work" and "One Week on the Ode Trail." Through this resident support program, the company plans to develop lodging made from recycled yarn to give visiting travelers an eco-friendly experience during their stay.

Gaemilpung Village Management Social Cooperative

The Gaemilpung Village Management Social Cooperative carries on the spirit of generosity and community service instilled by the historic merchant Kim Man-deok. Centered around key community spaces created through the Gaemilpung urban regeneration project, including the Kim Man-deok Village Complex Center, the Kim Man-deok Inclusive Care Center, and the Mandok Brewery, the cooperative supports social job creation as well as sharing and care programs by facilitating the local economy through the village's history, culture, and community resources. Mandok Brewery has introduced Mandok 7, a Jeju fresh malted beer, and has opened sales channels through the Kim Man-deok Inn and the Naeon Smart Store, expanding the reach of Jeju-made spirits both online channels and hotels and major outlets. Through this Jeju province resident support program, the cooperative aims to build a stable production and supply system for Mandok 7.

The World of Citrus Through Five Senses
2025 Citrus Museum 20th Anniversary
Special Exhibition "Citrus Fantasia"

We think we know citrus inside and out. Many of us remember peeling mandarins in a warm room on winter days, or that burst of bright, sweet-tart juice filling our mouths that hasn't ever truly experienced citrus itself on a deeper level? If you find yourself wondering, what the Citrus Five Senses Experience Exhibition - Citrus Fantasia has one chance in a million light and explore it more fully.

Looking at Citrus Anew,
Across Twenty Years

This special exhibition, prepared for the Citrus Museum's 20th anniversary, takes citrus, the symbol of Jeju and a part of everyday life, out of the familiar idea of a simple, tasty fruit and reinterprets it through the lens of culture and art. It shifts the focus from citrus as a single object to the many elements within it, viewing each to its own living presence. This journey explores the resource and hidden charm of citrus through the five senses: sight, sound, smell, touch, and taste. The exhibition follows these senses in sequence. Each one reveals citrus in its own way, allowing visitors to encounter an unfamiliar side of something they thought they knew well.

71

Kwon *min

74p

I liked the cute design of the arts section.

Kang *eun

I enjoyed reading about the special exhibition at the Citrus Museum. It's nice to have a section where you can easily find information on the various cultural events happening around Jeju.
