JEJU CHERRY BLOSSOMS

**CHANGES BEGIN WITH
CHERRY BLOSSOMS**

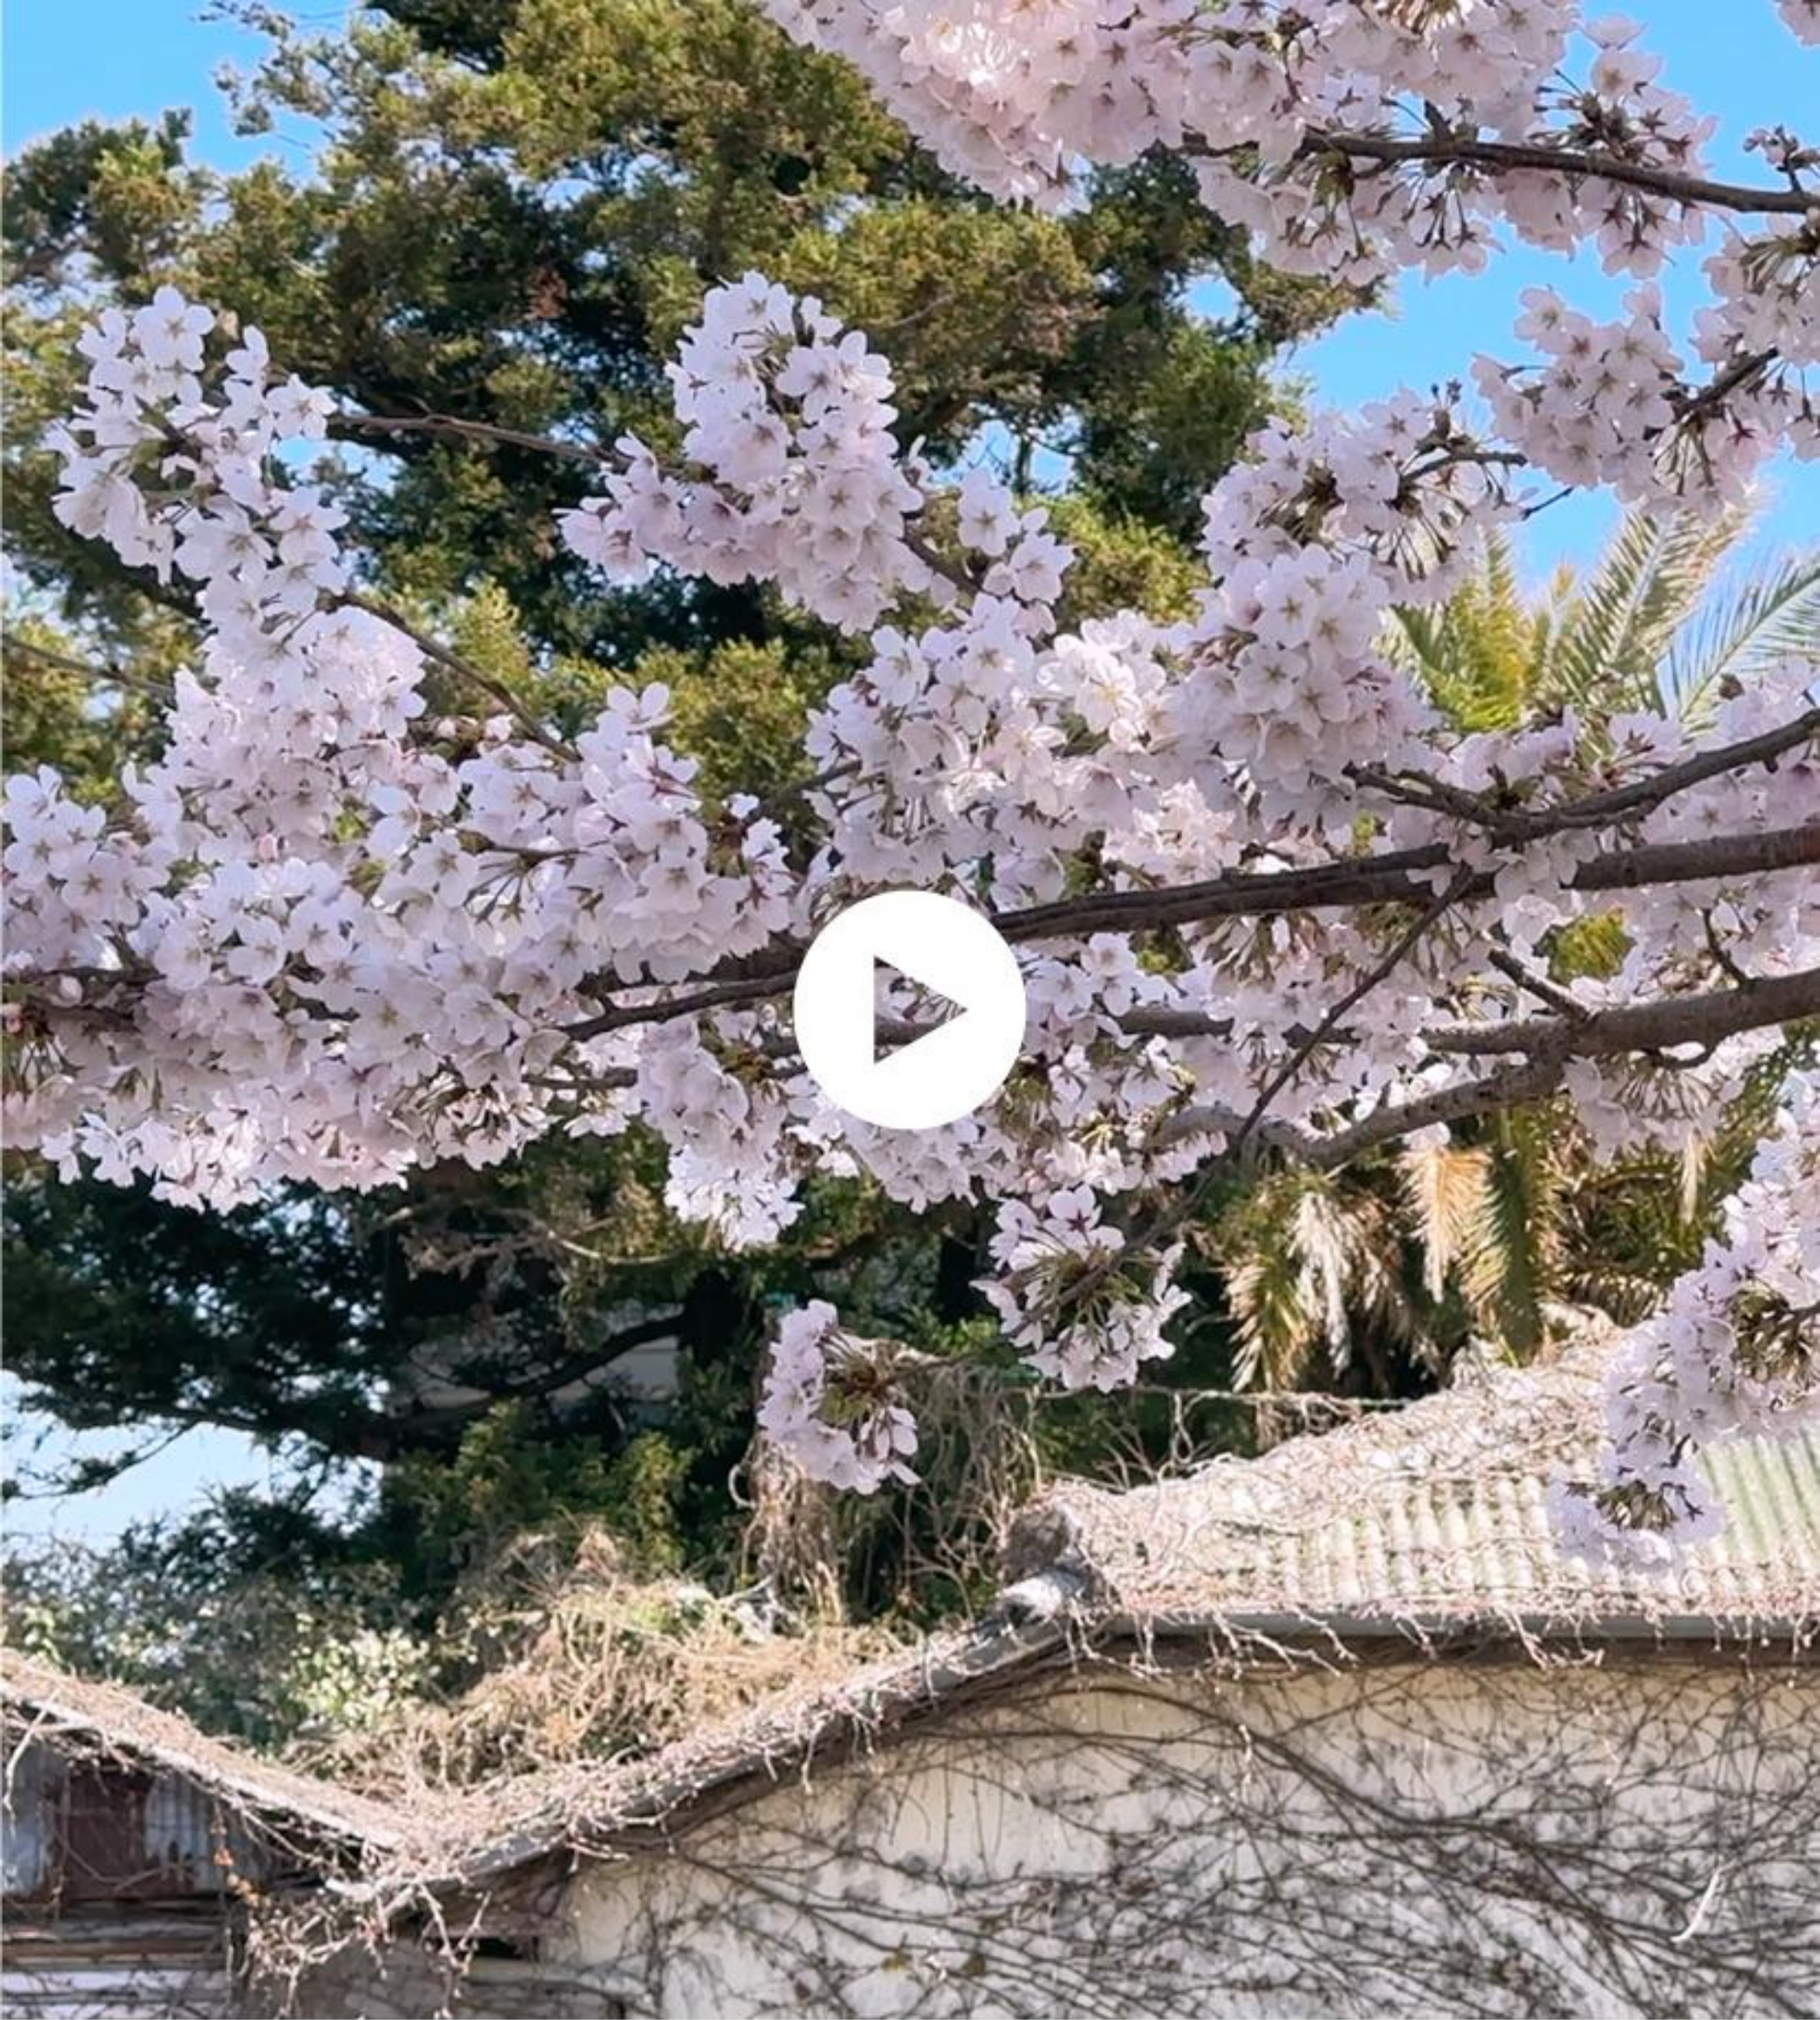

A Name Called by the Cherry Blossoms

March in Jeju blushes pink.
Buds burst open at the tips
of the king cherry trees,
and the wind is no longer cold.

When winter's traces are shed,
the spring hidden beneath
reveals itself.

Walking along a path
where cherry petals drift in the air,
everything begins again.

JDC MAGAZINE
MARCH 2026

Jeju Free International City Development Center (JDC)'s digital magazine [Dream of Jeju](#), published to share Jeju's vision as a Free International City and bring that vision closer to reality, returns with the theme "Change Begins with Cherry Blossoms." This issue highlights a series of positive developments: newly arrived companies at JDC Route 330 that signal a fresh start, Jedam Daycare Center where children's laughter fills the air, and Movie Truck Jeju, a program that brings films directly to communities with limited access to cultural facilities.

(JDC is working to build an international city where growth and coexistence are in balance by creating new value for Jeju. As a public corporation under the Ministry of Land, Infrastructure and Transport, JDC will continue advancing key projects in tourism, education, healthcare, and high-tech industries while identifying new initiatives to strengthen the foundation for Jeju's future growth.

Innovative Companies Driving Jeju's Future

JDC Route 330 Selects New Resident Companies

JDC Route 330, the Jeju Innovation Growth Center located at 330 Cheomdan-ro in Jeju City, has selected its new resident companies and a partner organization for 2026. In this round of recruitment, 12 tech startups and one partner organization applied. Following document screening and presentation evaluations, seven startups and one partner organization were selected. JDC will now proceed with space allocation and tenancy agreements for the selected companies and operate a range of business support programs from March through December 2026.

Route 330: Supporting the Scale-Up of Tech Startups

Route 330 provides office space and research facilities for tech startups in emerging industries such as AI and future mobility. It also runs a range of programs, including commercialization funding, scale-up support through partner organizations, investment attraction, and assistance with global market entry.

In this round of recruitment, 12 tech startups and one partner organization applied. Following document screening and presentation evaluations, seven startups and one partner organization were selected. JDC will proceed with space allocation and tenancy agreements for the selected companies and operate various business support programs from March through December 2026. Route 330 is expected to play a key role in revitalizing Jeju’s startup ecosystem and driving the next phase of growth at the Jeju Advanced Science and Technology Park. 🌊

Route330 Resident Companies

Personal AI Co., Ltd.

A technology company that builds a data sovereignty-centered ecosystem in which individuals directly control and leverage their own data, powered by on-device MyData technology that processes data locally on personal devices. The company provides hyper-personalized AI agent services ready for real-world use.

awesome Ray Co., Ltd.

A company transforming the potential of carbon nanotubes (CNT), a next-generation advanced material with exceptional electrical, thermal, and mechanical properties, into real-world value and expanding its applications across a wide range of industries.

Future-X Co., Ltd.

A mobility technology platform provider that connects vehicle certification, warranty, manufacturing, and distribution. The company began with AI-based integrated diagnostics for electric vehicle (xEV) batteries and power electronics (PE) systems.

WIDERLAB Co., Ltd.

WIDERLAB

A paperless electronic document platform that enables the sending, verification, and storage of legally binding electronic documents through KakaoTalk. Its service PaperIn allows users to manage the entire document workflow, including drafting, sending, receiving, and signing, within a single platform.

the YS Co., Ltd.

더윤슬

A company that supports Korean brands throughout their global expansion through AI-driven e-commerce and export automation solutions. The platform integrates product information automation, multilingual translation, country-specific regulatory and customs analysis, and overseas distribution management to improve global sales efficiency.

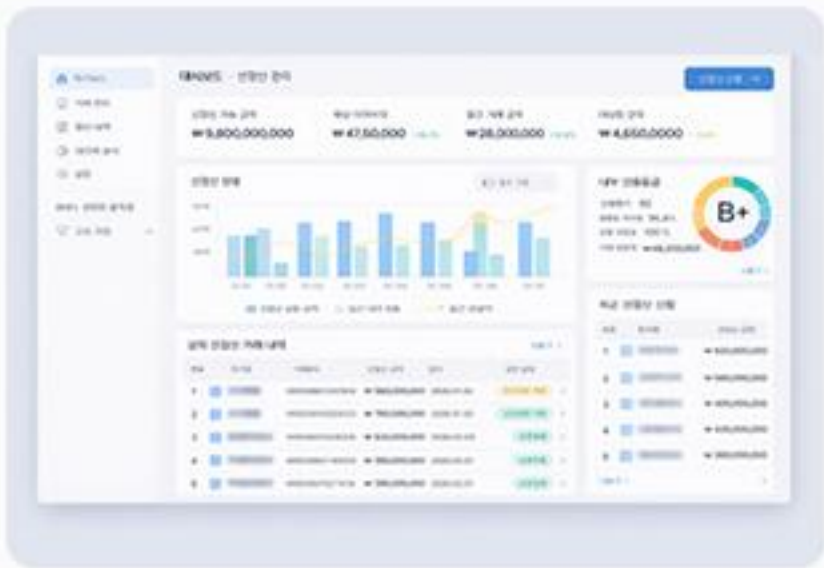

KAIROS Co., Ltd.

KAIROS

A company developing high-performance silicon anode materials for rechargeable batteries to reduce charging time and extend the driving range of electric vehicles. The company holds core technology for high-capacity silicon materials with competitive pricing and is developing sustainable solutions through resource recycling.

Logi Pay Co., Ltd.

A logistics settlement management platform that streamlines complex settlement, collection, and payment processes in freight transportation. The platform integrates delivery confirmation, electronic tax invoice issuance, and payment tracking in a single system.

Route330 Cooperative Partner

ZEPHYRUS LAB

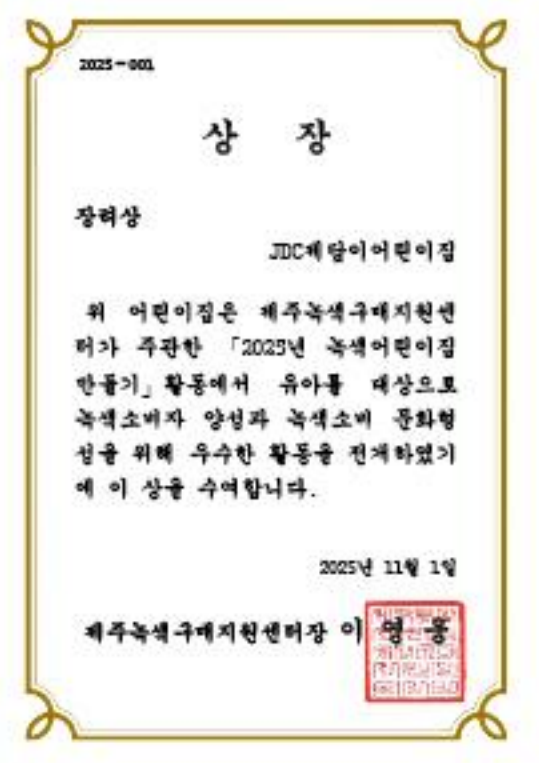

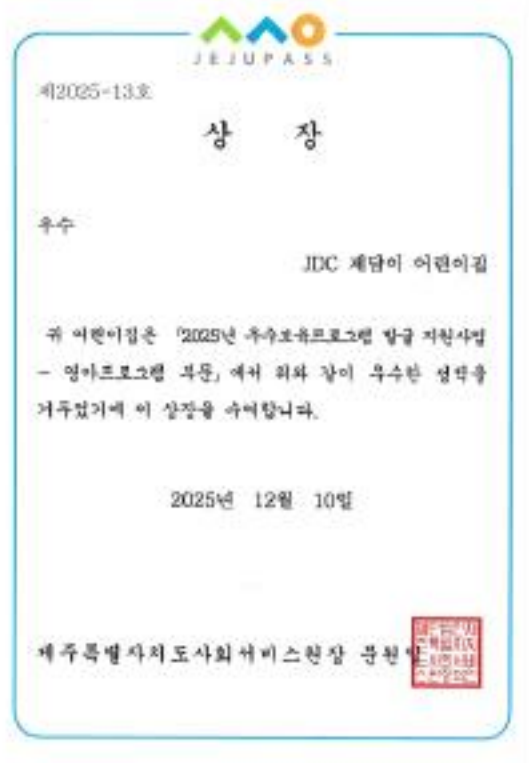

Zephyrus Lab is one of Korea’s leading startup incubators, supporting the growth and scale-up of early-stage companies through business diagnostics, business model and investment strategy development, partnership expansion to strengthen scalability, and direct and indirect investment through venture incubation programs.

Setting a New Standard for Childcare in Jeju JDC Jedam Daycare Center

Less than a year after opening in March 2025, JDC Jedam Daycare Center is already drawing attention across Jeju's childcare sector. The center has received several awards, including a prize at the Jeju Childcare Support Center's Outstanding Childcare Program Competition, a Special Award from the Korea Child Care Promotion Institute's Samsung Diversity Program, and an Encouragement Award in the ESG Program category from the Jeju Green Procurement Support Center.

Behind these achievements is a new childcare model created through the combination of Puruni Childcare Support Foundation's proven programs, Jeju's natural environment, and JDC's innovative approach.

Three Awards in Just One Year

Since opening in March 2025, JDC Jedam Daycare Center has quickly gained recognition and emerged as a new model for childcare in Jeju. The center received an award at the Outstanding Childcare Program Competition hosted by the Jeju Childcare Support Center, earned a Special Award from the Korea Child Care Promotion Institute for the Samsung Diversity Program developed in partnership with the Samsung Welfare Foundation, and received an Encouragement Award in the ESG Program category from the Jeju Green Procurement Support Center under the theme Building a Sustainable Future for Jeju.

The center's work extends beyond awards. It participated in developing training materials and content for the revised Standard Childcare Curriculum through the Korea Institute of Child Care and Education. It also contributed to a research project on strengthening community-based industry-academia cooperation as part of Jeju Halla University's 2025 Junior College Innovation Support Program. In addition, the center plans to present a poster at the ISSBD 2026 conference of the International Society for the Study of Behavioural Development.

Support for the Gotjawal Conservation Fund

Yet perhaps the most meaningful achievement lies elsewhere. Over the past year, the children organized exhibitions and bazaars featuring their own work and donated the proceeds to the Gotjawal Shared Conservation Foundation. They displayed their artwork, ran the bazaars themselves, and watched as coins gradually filled the Gotjawal donation box placed at the daycare entrance. Through this experience, the children learned that their actions can help protect nature and bring joy to others.

Where Puruni's Programs, Jeju's Nature, and JDC's Innovation Come Together

JDC Jedam Daycare Center consists of four classes: a one-year-old class, a two-year-old class, a mixed class for ages three and four, and a five-year-old class. Ten teachers work in pairs through a co-teaching system, ensuring children's safety and providing individualized care. In total, 15 staff members, including assistant teachers, extended-hour teachers, and kitchen staff, support the children's healthy and happy development. The center is a workplace daycare facility operated by the Puruni Childcare Support Foundation. Based on Puruni's play-centered

and child-centered childcare programs, Jedam Daycare Center incorporates the unique natural environment of Jeju together with the innovative setting of the JDC Advanced Science and Technology Park.

For younger children, the center offers specialized programs such as an interactive picture-book language program and a transition program for two-year-olds. For older children, a school readiness program helps prepare them for the transition to elementary school.

A Small Laboratory Where Play Changes the World

At Jedam Daycare Center, children lead the rhythm of the day. The center operates from 8:00 a.m. to 7:30 p.m., and during the core childcare hours from 9:00 a.m. to 4:00 p.m., indoor and outdoor free play forms the heart of the daily routine.

Infants freely choose activities such as physical play, exploration, language, and creative expression. Older children develop their own play across a variety of learning areas, including block play, role play, language, math and science, music, and art.

Parent volunteer programs

Structured Childcare and Encouraged Parental Involvement

Parents play an irreplaceable role in a child's growth, and the JDC Jedam Daycare Center actively encourages their participation. The annual parent event calendar is thoughtfully structured to include parent orientation sessions, individual consultations, the Puruni Family Festival, parent lectures, and small showcase performances. The Puruni Family Festival in May, featuring indoor and outdoor play and activities for the whole family, is the event children look forward to most.

Parent volunteer programs are equally vibrant. Parents are invited to bring their diverse talents into the life of the center through musical instrument performances, storytelling sessions, garden tending, career introductions, support as assistant teachers on outings, classroom environment setup, library management, and educational material production.

Real-time communication is made possible through the Puruni Childcare Support Foundation website and mobile app. Parents can check on their child's daily routine through the daily communication log and stay ahead of the week's play and activities through the childcare activity plan.

Various indoor activity spaces

The Puruni YouTube channel "Parent LAB" also offers parenting tips and child-rearing guidance from childcare specialists.

A New Standard for Workplace Childcare in Jeju

JDC Jedam Daycare Center has quickly emerged as a model for childcare in Jeju, supported by a strong foundation of institutional support. In addition to government childcare subsidies, additional expenses are covered by the company, helping reduce the financial burden on parents. Extended childcare is also available for children ages three to five without separate eligibility requirements.

Shared spaces such as the entrance lobby, reading hall, and indoor playground provide ample room for children to play freely with their peers and develop social skills. Above all, the center's core philosophy is to respect the individuality of each child and support their happy growth at their own pace and according to their interests. 🌊

Children Who Grow Through Play

Kim Hee-jeong,
Director of
JDC Jedam Daycare Center

Please introduce yourself.

Hello, I'm Kim Hee-jeong, director of JDC Jedam Daycare Center. Our daycare's name, Jedam, carries a special meaning. It refers to children who resemble Jeju and children who hold Jeju within them.

The name reflects our hope that the children will grow up as clear and bright as Jeju's blue sea, as strong and dependable as Hallasan, and as full of life as the Gotjawal forest. Since opening in March 2025, I have worked to create an environment where each child can grow alongside Jeju's natural surroundings and truly live up to that name.

What makes Jedam Daycare Center unique?

As a daycare operated by the Puruni Childcare Support Foundation, we follow Puruni's core educational philosophy of child-centered and play-based learning. At the same time, we incorporate Jeju's unique natural environment into our programs. The Gotjawal forest surrounding the center serves as both a playground and a place of learning for our children, and we work with the local community to reflect this environment in our curriculum. Through these experiences, children naturally learn to see Jeju, feel connected to it, love it, and understand that it is something precious worth protecting.

We are grateful that these efforts have already been recognized. Even though the center has been open for less than a year, we received an award at the Jeju Childcare Support Center's Outstanding Childcare Program Competition, a Special Award from the Korea Child Care Promotion Institute's Samsung Diversity Program, and an Encouragement Award from the Jeju Green Procurement Support Center.

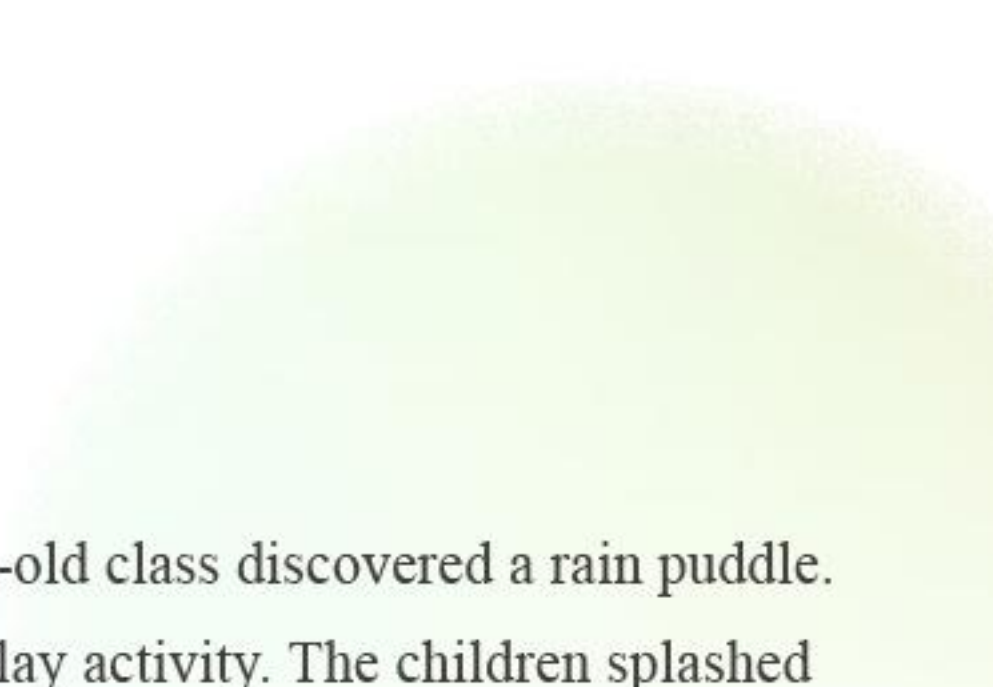

Special Award, Samsung Diversity Program, Korea Child Care Promotion Institute

Ultimately, we hope our daycare will be a second home for the children and a place where parents can feel confident and focus on their work, knowing their children are well cared for.

What educational direction does Jedam Daycare Center aim to pursue?

Our center focuses on three core educational directions, all of which are naturally integrated into a play-based curriculum for children ages one to five.

The first is child-led, experience-based learning. This reflects Puruni's philosophy of child-centered and play-based education. Rather than teachers deciding what children should learn on a given day, activities begin with the children's own curiosity and interests.

For example, one day the two-year-old class discovered a rain puddle. That moment turned into a water play activity. The children splashed with their hands, stirred the water with sticks, and tossed in stones. The teacher stayed nearby and helped extend the play by asking questions such as, “Look at the water splash,” or “What sound did the stone make when it hit the water?” This is what child-led learning looks like in practice.

The second direction is respecting diversity and creativity. Instead of giving children a fixed answer or telling them how something should be done, we provide loose parts such as wooden pieces, fabric scraps, and natural materials. Even with the same materials, children create very different things. One child might build a castle, another might make an animal, and another might turn the materials into a musical instrument.

In this open environment, children learn to think and express themselves in their own ways. I remember a three-year-old who showed me a creation made from loose parts and said, “This is a flying car. But it broke down, so I’m fixing it.” That kind of imagination and storytelling is the starting point of creativity. This educational approach was recognized with the Samsung Diversity Program Special Award from the Korea Child Care Promotion Institute.

What strengths come from being a daycare center located in Jeju?

At Jedam Daycare Center, we incorporate Education for Sustainable Development, or ESD, through Jeju's natural environment. Our hope is that the children who grow up surrounded by Jeju's nature will develop into global citizens. ESD includes not only environmental awareness but also values such as peace, human rights, and cultural diversity, and we begin by connecting these ideas to Jeju's natural surroundings.

Activities such as fundraising to support Gotjawal conservation, collecting trash along Jeju's coastline, and experiencing traditional

Outdoor activity for animal protection

Jeju culture are naturally incorporated into the play of children ages three to five. Last year, the three- and four-year-olds even organized their own exhibition and bazaar and donated the proceeds to the Gotjawal Conservation Foundation and a local food bank. The form of play changes as children grow. One-year-olds explore through sensory play with natural materials. Two-year-olds engage in imitation and imaginative play. Children ages three to five participate in cooperative and integrated play with their peers. Although the activities differ by age, they all share the same goals: encouraging children's initiative, creativity, and the values of global citizenship. 🌊

Food donation to a local food bank

Jeju's Dream Reaches the World Jeju English Education City

Jeju English Education City has once again proven its standing as a hub for developing global talent. In 2025, three international schools founded on British, Canadian, and American educational traditions achieved notable results, including the nation's top IB Diploma performance, admissions to leading universities around the world, and outstanding achievements in sports and community service. These accomplishments highlight the city's growing competitiveness as a global education hub.

Branksome Hall Asia graduated its first cohort to complete the full IB program. NLCS Jeju recorded the highest IB Diploma results in Korea, while SJA Jeju expanded its presence in international competitions and global programs. From Jeju English Education City, Korean education continues to reach beyond national borders and connect with the world.

NLCS Jeju

**No. 1 in Korea for IB and
Strong Admissions to Top Global Universities**

NLCS Jeju, the first overseas campus of the prestigious North London Collegiate School in the United Kingdom, ranked first in Korea in the 2025 IB Diploma results with an average score of 37 points, demonstrating its strong academic performance. The achievement is particularly notable given that more than 100 students took the examination.

Since graduating its first class in 2014, NLCS Jeju has produced 19 students with perfect IB scores. In 2025, one student achieved the maximum score of 45, while eight others scored 44. In the IGCSE examinations, 13 students earned A* grades across all subjects, and more than 75 percent of students achieved grades of A or higher. Five students also received Top in the World awards for individual IGCSE subjects.

The school's university admissions results have also been impressive. Students received Early Offer and Early Decision admissions from leading universities, including the University of Oxford and the University of Cambridge, as well as several Ivy League institutions. Admissions span a wide range of fields, including music, sports, design, and business, as well as highly competitive majors such as medicine and engineering.

NLCS Jeju has also distinguished itself in community service. Project Salute received the Governor's Award from Jeju Special Self-Governing Province in 2025, while the Earthwise Wardrobe Initiative received the Superintendent of Education Award. Over the past five years, the school has won a total of 20 awards at the Jeju Youth Volunteer Competition. Beyond academics, NLCS Jeju offers more than 200 programs each week across a wide range of areas, including arts and creative activities, dance, drama, music, outdoor adventure, and sports. Building on the success of last year's summer camp held with the Massachusetts Institute of Technology, the school plans to launch a new program this year in collaboration with the University of Pennsylvania.

BHA

First Graduates of the Full IB Program

Branksome Hall Asia (BHA), the Asian campus of Canada's prestigious Branksome Hall, reached a major milestone in August 2025 by graduating its first cohort of students who completed the full International Baccalaureate (IB) program. These students enrolled in kindergarten when the school first opened and went on to complete their entire academic journey, from early childhood through high school, within the IB framework.

Academic results were strong. The highest IB score achieved was 44 points, while 45 percent of students scored 35 points or higher and 13 percent scored 40 points or higher. The average IB score was 34 points, three points above the global average. In addition, 90 percent of graduates earned a bilingual diploma.

University admissions results were also impressive. As of February 1, students had received a total of 143 offers of admission, including 10 Early Decision acceptances. Offers came from leading universities around the world, including the University of Cambridge, Johns Hopkins University, University College London, the University of Toronto, the University of Melbourne, the University of Edinburgh, McGill University, the University of Southern California, and Vanderbilt University. BHA also supports holistic development through a wide range of extracurricular programs, including 86 clubs and after-school activities in the elementary school and 74 in the middle and high school. The school received the ISC School of the Year Award in 2021 and offers specialized programs such as the KAIST Mentorship Program and the BHX Exchange Program. Beginning in the 2025–2026 academic year, male students joined the Senior School for the first time, marking an important institutional change for the school.

Please introduce yourself.

Hello, I'm Kim Hee-jeong, director of JDC Jedam Daycare Center. Our daycare's name, Jedam, carries a special meaning. It refers to children who resemble Jeju and children who hold Jeju within them.

The name reflects our hope that the children will grow up as clear and bright as Jeju's blue sea, as strong and dependable as Hallasan, and as full of life as the Gotjawal forest. Even though the center has been open for less than a year, we received an award at the Jeju Childcare Support Center's Outstanding Childcare Program Competition, a Special Award from the Korea Child Care Promotion Institute's Samsung Diversity Program, and an Encouragement Award from the Jeju Green Procurement Support Center.

SJA Jeju hosts a club fair twice each year and operates more than 90 clubs in the first semester and 70 in the second. Across academic, artistic, and athletic areas, these activities encourage student leadership and collaboration with teachers while supporting students' overall development.

Students also actively participate in international competitions.

The STEM racing team DriftX competed in Singapore as Korea's representative. The school's mathematics team took part in the World Mathematics Championships, where one student earned a Gold Ticket to the WMC Junior Finals to be held at the University of Melbourne.

SJA Jeju also participated in the 4th BHA Model United Nations Conference (BHAMUN IV), joining more than 200 delegates from 11 schools. In addition, the student club Rho Kappa collaborated with the Jeju April 3 Peace Memorial Hall to host a two-week exhibition on the Jeju April 3 Incident, further strengthening connections with the local community. 🌊

A Companion for Every Journey — **RAWROW**

Every journey begins the moment you step outside. From daily commutes to weekend outings and long-awaited trips to the mountains or the sea, RAWROW creates bags designed for life on the move. Easy to carry while traveling and convenient wherever you go. The RAWROW collection at JDC Duty Free reflects the brand's philosophy of simplicity, functionality, and thoughtful design that lasts.

RAWROW

JDC 면세점

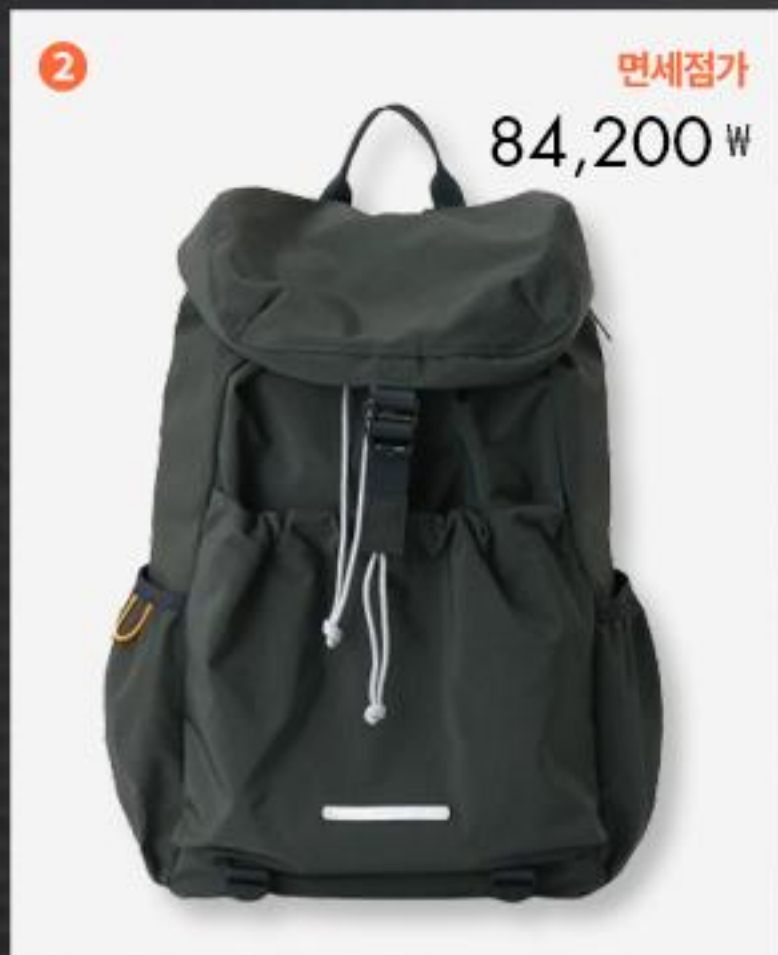

FERRAGAMO Watch
NEW OPEN

RAWROW

RAWROW

① STRING BACKPACK ep.2 750

The signature backpack of the STRING series. Made from water-resistant washed nylon that helps protect against everyday moisture, it features a spacious interior that accommodates laptops up to 16 inches. The round stopper used to tighten the drawstring has been redesigned for a more comfortable grip, while a zip pocket and snap button inside the front pocket add convenient storage for organizing small essentials.

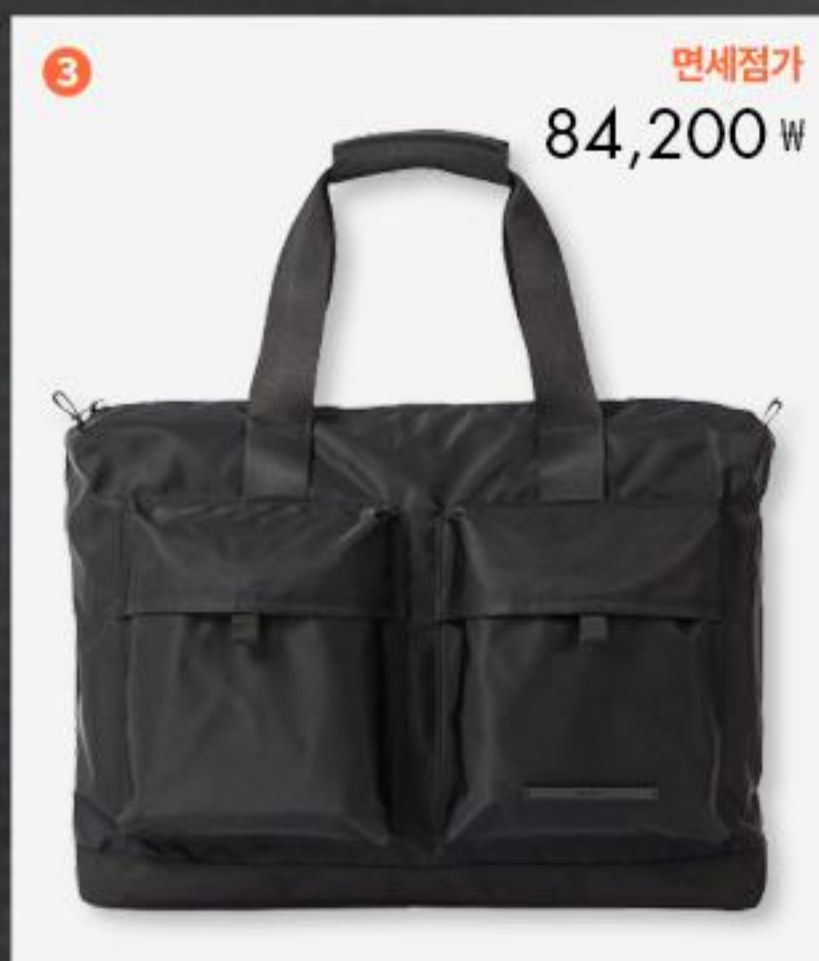

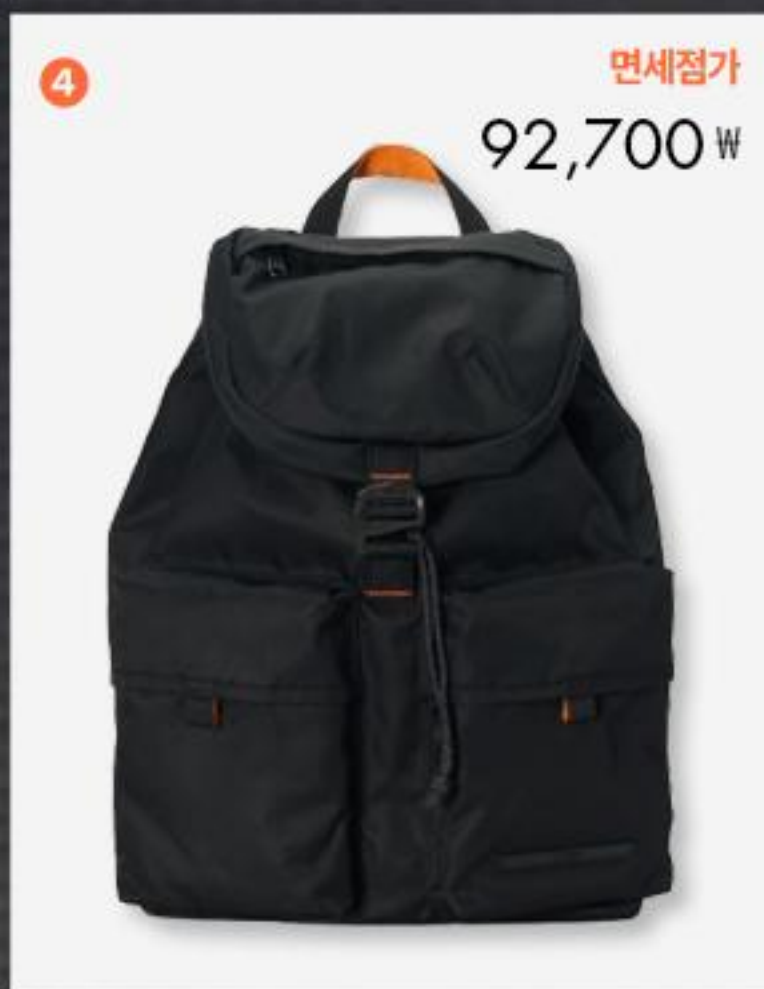

② STRING RUCKSACK MINI ep.2 963

A mini rucksack that captures the spirit of the STRING series in a compact size. Ideal for light outings, walks, or short trips, it retains the signature drawstring closure while presenting a clean and refined silhouette. With a comfortable size and practical storage, it works perfectly as an everyday bag.

③ CITY WALKER TOTE 010

A lightweight tote made from 100 percent nylon, weighing just 380 grams. Measuring 40.5 cm wide, 29 cm tall, and 11 cm deep, it offers generous storage capacity while remaining easy to carry. Designed to move effortlessly from daily commutes to weekend outings, it serves as a practical companion for everyday city life.

④ CITY WALKER RUCKSACK MINI 923

A mini rucksack made from 100 percent nylon and designed for city living. Its compact size, lightweight construction, and clean design make it suitable for daily commutes as well as weekend outings. A versatile bag that fits naturally into an active urban lifestyle.

⑤ R TRUNK ALUMINIUM

A carry-on suitcase crafted from ultra-lightweight, high-strength polycarbonate. With a 37-liter capacity and a 20-inch size, it is ideal for trips lasting two to three days. RAWROW's signature TT HANDLE™ allows you to manage multiple bags more easily, while silent wheels provide operation approximately 20 dB quieter than typical models. A wheel lock function and wide handle complete a design that combines style with practical functionality.

Plogging at Iho Tewoo Beach and the Yerae-dong Coast ↑

JDC Dream Sharing Volunteer Corps : Connecting Jeju Through the Spirit of Giving

In 2025, the JDC Dream Sharing Volunteer Corps worked closely with the local community through a range of volunteer activities.

Over the course of the year, 808 employees took part in 26 initiatives, helping protect the environment, support neighbors in need, and bring renewed energy to local businesses.

Warmth Shared Through Caring Hands

This year, the JDC Dream Sharing Volunteer Corps began planning its volunteer activities by listening to employees. A survey was conducted to better understand employees' interests and demand for volunteer work, and the results were incorporated into the annual activity plan. As a result, participation increased from 23 activities with 725 participants in 2024 to 26 activities with 808 participants in 2025. Among the areas identified in the survey, local economic revitalization was seen as the most important area for expansion. Five volunteer activities were organized in this category, attracting the largest number of participants among all volunteer programs. With guidance from a dedicated department, departments were also encouraged to organize their own volunteer initiatives. As a result, department-led volunteer activities doubled compared with the previous year.

From Jeju's Shores to Local Markets : Volunteer Efforts Across the Island

The JDC Dream Sharing Volunteer Corps carried out volunteer activities across Jeju throughout the year. In the environmental sector, the group conducted plogging activities at Iho Taewoo Beach and along the coast of Yerae-dong in connection with the Eum (이음) Jobs Program, collecting about 1,450 kilograms of marine waste.

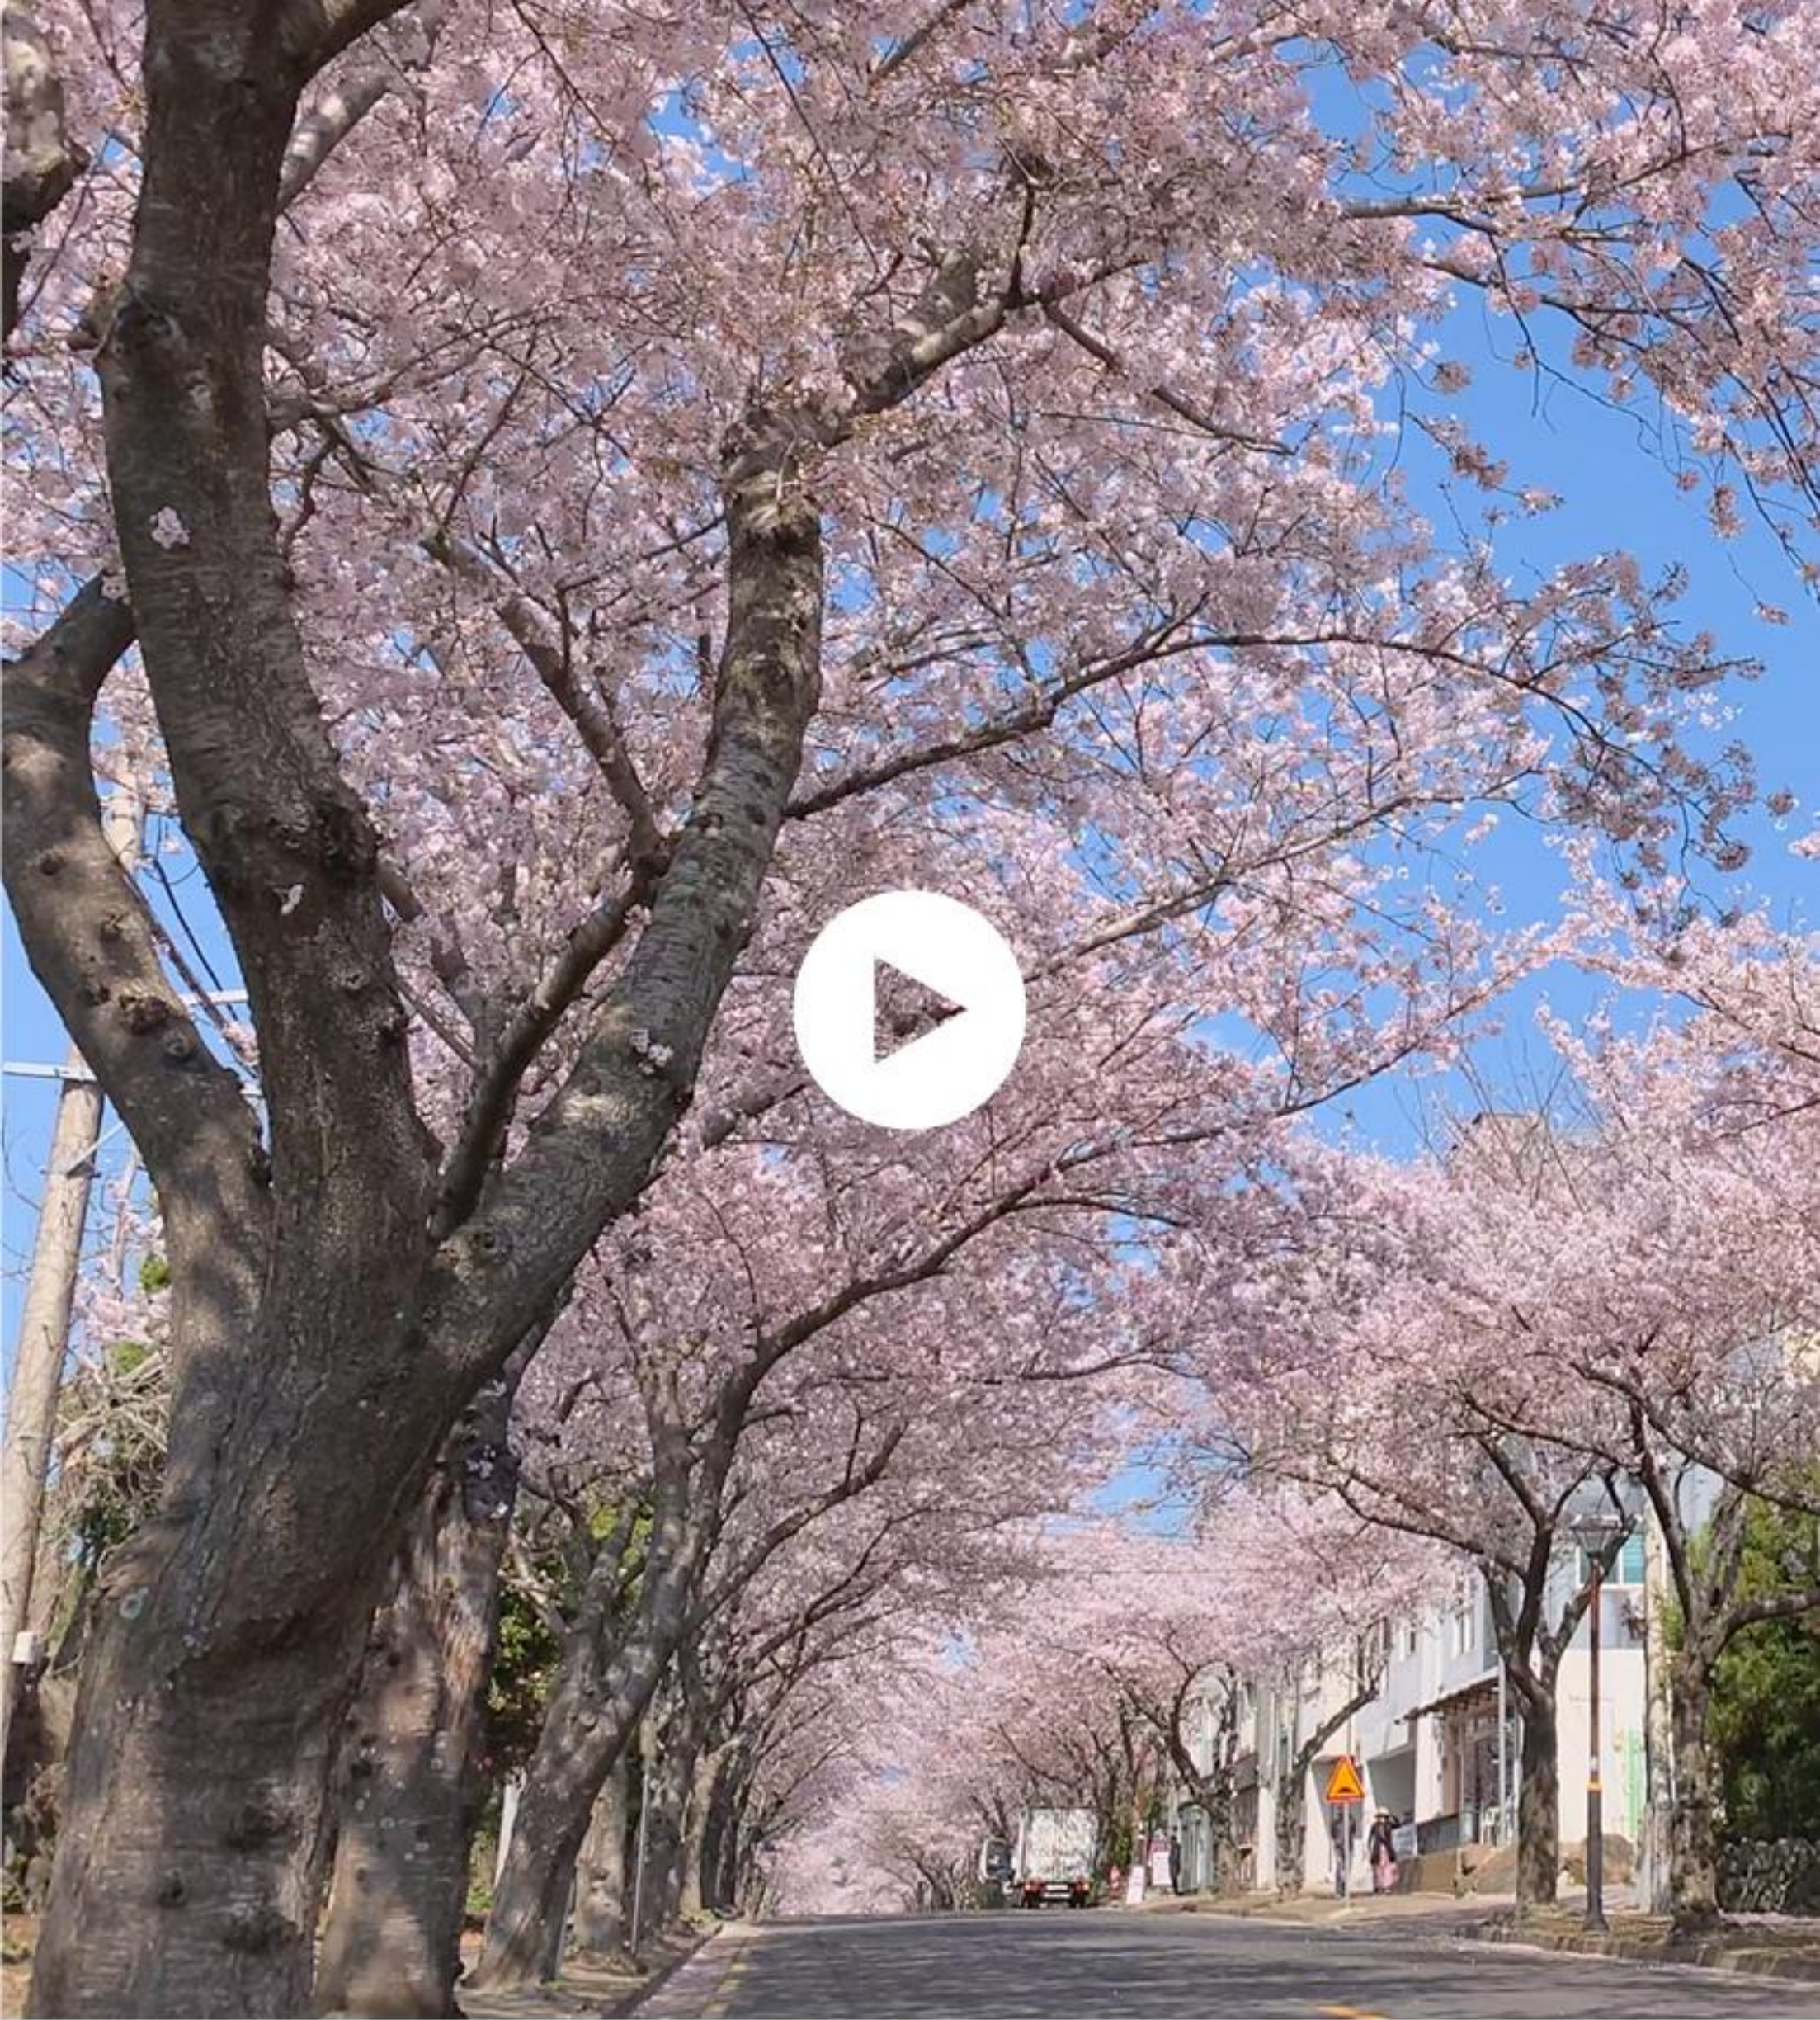

Volunteers also planted 30 hinoki cypress trees through the One Tree for Zero Carbon initiative to help preserve Jeju's clean natural environment. A blood donation campaign was also organized to promote the value of sharing life with others.

Efforts to support the local economy also received strong participation. Through a partnership with the Jeju Special Self-Governing Province Volunteer Center, large-scale consumer promotion activities were held at the Jeju Minsok Oil Market and the Seogwipo Hyangto Oil Market. The JDC with Markets and Shops campaign, held ahead of the Chuseok holiday, drew 185 participants and helped revitalize traditional markets and neighborhood businesses.

Volunteers also extended support to vulnerable members of the community. Activities included barrier-free tourism assistance for 30 people with physical disabilities, the making of baby quilts for single mothers, and the donation and installation of 16 mattresses at Sionvil, a support facility for young adults preparing for independent living. For Chuseok, food packages were delivered to 520 low-income households. During the winter season, 420 food bags made with products from Jeju were distributed to vulnerable residents, offering practical support during the cold months.

The Power of Partnership : Expanding the Reach of Giving Through Networks

The activities of the Dream Sharing Volunteer Corps stand out in large part because of its close collaboration with local networks. JDC has built a foundation for cooperation with related organizations by connecting with the Public Institution Innovation Network and joining the Jeju Social Contribution Network. Joint volunteer activities with institutions such as the Government Employees Pension Service, the Korea Racing Authority Jeju Branch, and the Korea Foundation helped strengthen cooperation among organizations while fostering a broader sense of community.

Movie Truck Jeju Lights Up Nights Across the Island

Movies arrived in villages without cinemas. Movie Truck Jeju, supported by JDC's Resident Support Program, is a mobile cinema project that brings films directly to local communities. Equipped with a truck carrying a screen and sound system, the project travels to towns and villages across Jeju's eup, myeon, and ri areas.

Through Movie Truck Jeju, film becomes a shared experience that brings residents together. Villagers gather to watch, talk, and spend time with one another, creating opportunities for conversation and deeper understanding within the community.

A Cinema That Waits for Its Audience? Or One That Goes to Them?

A cultural gap remains between Jeju's rural eup and myeon areas and its urban centers. For many residents, especially older adults, children and teenagers, and families in care situations, visiting a cinema is not always easy. Movie Truck Jeju was created in response to this reality. The project is based on the idea that culture should not remain tied to a fixed place but should travel to where it is needed. It also reflects the view that public cultural policy should move beyond waiting for audiences and instead reach out to them directly.

Launched in 2025 with support from the JDC Resident Support Program, Movie Truck Jeju aims to hold ten screenings each year while traveling to communities across Jeju's eup, myeon, and ri areas. Locations are selected with priority given to places where access to cinemas is limited or where residents such as children, teenagers, older adults, or care-dependent households face barriers to cultural access. Screenings take place in community spaces including village halls, schools, care centers, and other local gathering venues.

Movie Truck Jeju - On Site

When the Truck Arrives, the Village Festival Begins

The movie truck offers a unique cultural experience shaped by its mobility, flexibility beyond the limits of fixed venues, and the open atmosphere that comes with outdoor screenings. When the truck arrives and residents gather around to watch a film together, the experience creates memories that feel very different from those of a conventional movie theater.

Films are selected primarily from Korean independent cinema, with consideration given to the characteristics of each community and the organizations requesting the screenings. The program focuses on works that families and local residents can watch together and that encourage conversation across generations. Many of the selected films explore themes such as community, relationships, care, growth, and recovery. Screenings usually run for about 60 to 75 minutes and are followed by a GV session with the director or actors, allowing

↑
Movie Truck Jeju - On Site

audiences to continue the experience through conversation rather than simply ending with the film itself.

The first screening took place on February 7, 2025, in Bukchon-ri, featuring Ray's Winter Vacation directed by Park Seok-young. Although strong snow and wind made it impossible to hold the screening outdoors using the truck as originally planned, the audience responded warmly. Many residents said they appreciated having a screening in an area where cultural access is limited and valued the opportunity to deepen their understanding of the film through the post-screening discussion.

Toward a Cultural Platform That Connects Communities

With support from the JDC Resident Support Program, Movie Truck Jeju has been able to operate as a community-centered cultural initiative without being constrained by commercial profitability. The

operations team manages the entire process, from setting up the screen and sound equipment to running the event on site, working together with local communities to organize each screening. Movie Truck Jeju aims to become more than simply a traveling cinema. The project hopes to grow into a cultural platform that connects local communities. Its vision of sustainable film culture is one where the day the truck arrives is remembered not only as the day people watched a movie, but also as the day the whole village came together.

Movie Truck Jeju will continue its journey in 2026. Applications are currently open for villages and community groups across Jeju that wish to host screenings, with ten locations scheduled to be selected for visits between January and May. Through these visits, the project looks forward to creating many more meaningful moments in communities across the island. 🍂

Call for Participating Villages and Communities **– Movie Truck Jeju**

Eligibility Institutions, organizations, communities, or venue operators located in eup, myeon, and ri areas across Jeju
(schools, village associations, welfare organizations, cooperatives, resident groups, clubs, and youth, multicultural, or disability communities)

Program Period January - May 2026 / Visits to 10 locations planned

Application Period January 1 (Thu) – January 31 (Wed), 2026

Participation Requirements

Community able to accommodate 30-50 participants

- * Venue available or arranged for indoor screenings (day or night) or outdoor screenings (night)
- * Ability to assist with basic on-site support and promotion (poster distribution, event announcements, etc.)

Program Benefits

One free Movie Truck visit and Korean film screening program

On-site equipment support including screen, sound, and lighting

Special program featuring invited directors or actors

Commemorative gifts and interactive events for participants

Strengthening the Business Ecosystem Through Shared Innovation **The Performance Sharing Program**

**The Day the Movies
Come to the Village**

Movie Truck Jeju Lights Up Nights Across the Island

The program is also considered a policy designed to promote cooperation rather than impose regulation. While the government provides the institutional framework and incentives, the program itself operates on the basis of voluntary agreements between participating companies.

Key Requirements of the Performance Sharing Program

Three key requirements must be met for the Performance Sharing Program to be implemented. First, the goals of the cooperative activity must be agreed upon by both parties. Projects are identified through voluntary agreement between the contracting company and the subcontracting company, and the outcomes must be measurable through objective indicators.

Second, a standard contract must be prepared and signed in advance. The contract must clearly state the goals of the performance-sharing project, the joint efforts of the contracting and subcontracting companies, the method for sharing the results, and the terms agreed upon before the project begins.

Third, and most importantly, performance sharing must be carried out. When the agreed project goals are achieved and the results are confirmed, the outcomes must be shared according to the prior agreement. This may take the form of cash distribution, expanded order volumes or sales, or deliverables that can be evaluated and converted into measurable economic value.

Major Types of Performance Sharing

In practice, performance sharing programs take several forms, including new product and technology development, joint expansion into overseas markets, cost reduction, management system improvement, service improvement, process improvement, and performance enhancement. The Ministry of SMEs and Startups and the Korea Commission for Corporate Partnership present eight major categories of performance sharing.

The first category is new product and technology development. In this type, the contracting company and the subcontracting company collaborate to develop new products or technologies together or significantly improve existing ones. It also includes cases in which products or technologies previously dependent on imports are localized, with the resulting outcomes shared between the participating companies.

The second category is joint expansion into overseas markets. In this model, the contracting company and the subcontracting company work together to enter foreign markets or expand business operations abroad, sharing the outcomes generated through their joint efforts.

The third category is technology transfer. In this case, the contracting company provides technology or intellectual property to the subcontracting company free of charge or at a reduced cost, allowing it to be utilized in production or business activities. The economic value or revenue generated through this process is then shared according to terms agreed upon in advance.

The fourth category is process improvement. The contracting and subcontracting companies jointly improve part of an existing production or operational process. The outcomes, such as improved product quality, reduced costs, better delivery performance, and savings in raw material expenses, are shared between the two parties.

The fifth category is performance improvement. In this type, both companies work together to improve the performance of products or systems already in use. The resulting gains, such as higher productivity or reduced service delivery time, are shared according to the prior agreement.

The sixth category is cost reduction. Here, the contracting and subcontracting companies cooperate to improve the subcontracting company's cost management system or reduce inefficiencies in the production process, and share the outcomes that result from these improvements.

The seventh category is management system improvement. Through joint efforts, the companies enhance the subcontractor's production or management systems, sharing outcomes such as improved quality, reduced costs, and better delivery performance.

The eighth category is service improvement. In this model, both companies cooperate to maintain the contracting company's facilities and equipment or improve operational processes in order to enhance service quality and reduce costs, with the resulting outcomes shared between them.

JDC's Efforts to Expand the Performance Sharing Program

JDC has been working to promote shared growth with small and medium-sized enterprises through the Performance Sharing Program. Since 2013, the organization has operated the program under its internal [Performance Sharing Program Implementation Guidelines](#), identifying and implementing collaborative projects with partners in its designated duty-free business.

As the importance of performance sharing has increased within the public institution co-prosperity evaluation framework, JDC carried out a comprehensive revision of these internal guidelines in November of last year.

Through this revision, the limit on the estimated performance value for proposed projects has been relaxed, allowing JDC to accept a broader range of proposals from subcontracting companies. The revised guidelines also explicitly require confidentiality agreements, further strengthening the protection of subcontractors' business information. Going forward, JDC plans to expand the Performance Sharing Program beyond the duty-free sector to subcontractors across its various business areas. By identifying projects that fall under different types of performance sharing, the organization aims to translate the value of cooperation into tangible benefits for participating companies. 🌸

Proactive Administration: : Calling the Third Name Outstanding Employees for Proactive Administration Selected

With the completion of the third round of JDC's Outstanding Proactive Administration Employee (J-ACT) selection, the stories of two employees who have quietly driven change in the field were shared across the organization. By taking their responsibilities a step further through professional expertise and a strong understanding of on-site needs, they have set another milestone in JDC's culture of proactive administration.

Where Expertise Meets the Voice of the Field

A total of 20 nominations were submitted during the third round of the selection process, held from December 8 to 19, 2025. Following an internal review by the responsible department and a final evaluation by the Proactive Administration Support Committee, Yang Yunho, Senior Manager of the Education City Team in the Education and Culture Division, and Park Shinae, Assistant Manager of the Sales Support Team in the Duty-Free Planning Division, were selected as outstanding employees.

A commendation ceremony was held on January 12, 2026, where the recipients were presented with certificates of commendation, a cash award, and commemorative gifts for outstanding proactive administration employees.

2025 J-Act Awards

One notable feature of the third round of J-Act was the active application of professional expertise. Yang Yunho was recognized for moving beyond simply reviewing financial statement figures and instead conducting in-depth analyses of investment targets based on his accounting expertise, helping elevate the standard of JDC's investment review process.

Park Shinae introduced advance demand surveys to the duty-free healing program, which had previously seen declining participation due to repeated program formats. She also established a 24-hour customer response system using an AI voice bot, turning operational inconveniences in the field into tangible improvements.

With each new round, J-Act continues to broaden and clarify what proactive administration looks like in practice.

When winter's traces are shed,
the spring hidden beneath
reveals itself.

Walking along a path
where cherry petals drift in the air,
everything begins again.

What message would you like to share with your colleagues?

We are all working through challenging circumstances, but I hope we can continue thinking about how to move in a better direction from our respective roles and work together toward the same goals. I believe that small ideas and everyday actions, when accumulated over time, can become a powerful force for change within an organization.

I also hope we can build a workplace culture where people encourage and respect one another, and where every member of the organization can find both meaning and enjoyment in their work. 🍃

JDC NEWS & TOPICS

Jeju Aerospace Museum Launches Sign Language Video Service for Permanent Exhibition Guides

The Jeju Aerospace Museum, operated by JDC, began offering sign language video guides for its permanent exhibitions on February 11 to improve accessibility and convenience for visitors with disabilities. The service was launched after the museum was selected for the Ministry of Culture, Sports and Tourism's 2025 Sign Language Video Production Support Program for Exhibition Information. A total of 30 sign language videos have been produced, introducing the museum, its exhibition halls, and key exhibits. Each video includes subtitles along with the sign language interpretation and can be easily accessed by scanning the QR code provided in the sign language exhibition guide leaflet. The service is designed not only for visitors with disabilities but also for anyone seeking a more accessible way to explore the exhibitions. The museum has also continued to expand its accessibility initiatives. In 2022, in cooperation with the Jeju Special Self-Governing Province Sign Language Interpretation Center, sign language video guides were produced for seven major exhibits in the first-floor Aviation History Hall, including Air Hall, Flyer III, F-51D, F-86F, Buhwal-ho, and F-4D. Additional services include a Q-i exhibition robot that provides sign language and voice guidance, large-print guidebooks with Korean and English Braille embossing, and accessibility lifts installed within the exhibition halls to improve mobility for visitors with disabilities.

● JDC Supports Vulnerable Residents for Seollal Holiday

Sharing the Spirit of the Season So No One Is Left Behind

JDC carried out a holiday support initiative for vulnerable residents across Jeju in celebration of Seollal, Korea's traditional Lunar New Year holiday. The program was designed to help ease the financial burden that the holiday season can place on economically vulnerable households while promoting community support and shared prosperity.

Through the Community Chest of Korea's Love Fruit campaign, JDC donated Onnuri gift certificates worth 50 million won, which will be used to provide practical assistance to vulnerable residents across the island. The donated certificates are scheduled to be distributed to low-income households and other vulnerable groups around the Seollal holiday period and can be used to purchase daily necessities and other essential items for the holiday.

JDC plans to continue identifying and expanding a variety of social contribution initiatives that support local communities and promote shared growth, further strengthening its role as a public institution that grows together with the people of Jeju.

Dream of Jeju February 2026 Issue

Dream of Jeju
February issue [Click!](#)

Han *hee

The image of rapeseed fields in full bloom alongside stories about AI technology created a surprisingly beautiful contrast. It was reassuring to see JDC reaching out to the world while still holding on to what makes Jeju unique. I'll be cheering for the future being built on Jeju's own values.

Lee *gil

Even though it's still winter, the cover photo already felt like spring had arrived in Jeju. Watching the rapeseed flowers gently swaying in the breeze in the webzine video made me feel as if I were standing in a field on the island myself. It was a lovely and memorable moment.

Seo *seok

This issue felt warm and meaningful, especially in the way it showed Jeju's identity and the role of public institutions through real people's stories. I hope future issues will include even more concrete ideas for change and an even wider range of voices.

Ji *

February in Jeju — While the mainland is still in winter, Jeju is already welcoming spring with yellow rapeseed flowers. As I turned each page of Jeju's Dream, I felt that sense of warmth and renewal as well. News of spring arriving early in Jeju is always a joy to read about.

Park *bu

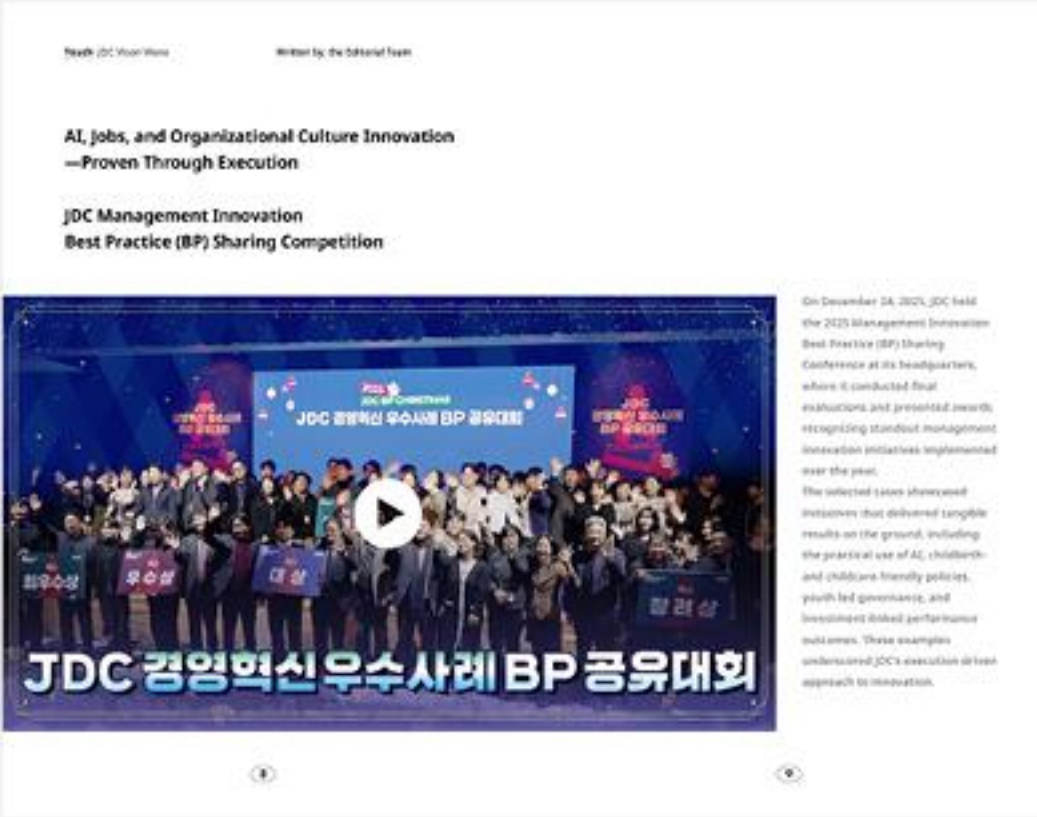

By introducing a variety of policies that support Jeju's development, the newsletter makes it easier for readers to understand what is happening across the island. I hope it continues to provide even broader information and contributes to building a warmer community in Jeju.

Kim *a 8p

I was impressed by JDC’s efforts to reduce logistics costs and streamline operations using AI. What stood out most was not just the technology itself, but the collaboration and communication among employees throughout the process. That spirit of embracing change seems to be raising the value of Jeju even further.

Kang *eun

Through the Vision Wave section, it was interesting to see how different departments are pursuing innovation in their own ways. Sharing these examples of innovation can inspire others across the organization, and I hope that momentum continues to grow.

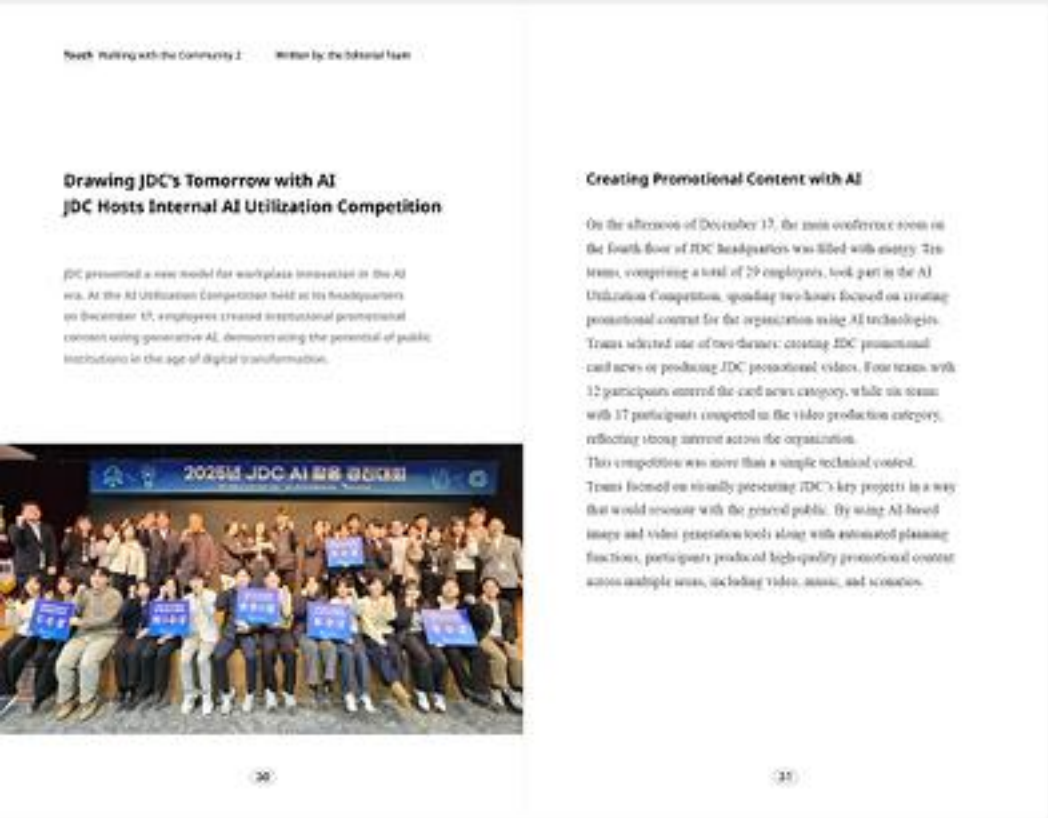

Shin *won 22p

The JDC Green Return initiative left a strong impression on me. Many households in Jeju have been quietly holding on to small appliances they no longer use, and this campaign offered a practical way to deal with them. Learning that the collected items were turned into circular resources and even led to donations made the initiative even more meaningful. I hope the program continues.

Park *yeong

What impressed me most about the JDC Green Return Campaign was that it moved beyond awareness and led to real action. Seeing resource circulation take shape in everyday life, with visible and meaningful results, showed how effective and sustainable environmental initiatives can be.

Jang *seon

36p

JDC’s story, and Jeju’s story as well, reaching global audiences through the activities of Global Friends is truly impressive. Seeing young people from different countries introduce Jeju through the Arirang TV program feels like a meaningful way to share the island’s unique charm with the world. The program shows that Jeju is far more than a tourist destination, highlighting not only its history and culture but also future-oriented technologies and projects such as autonomous mobility. It is also encouraging to see Jeju positioning itself as part of a global network through JDC’s vision and initiatives. I look forward to seeing Global Friends continue to grow and play an even greater role in introducing Jeju to the world.

Jang *sik

30p

It’s impressive to see a public institution exploring new approaches to workplace innovation in the age of AI. The process of employees using generative AI to create promotional content themselves clearly showed the possibilities that digital transformation can bring. The creativity and enthusiasm of the award-winning teams in the card news and video categories were especially impressive. I hope initiatives like this continue to strengthen employees’ AI capabilities and lead to meaningful innovation in the workplace.

Jeon *uk

I’ve also watched the program on Arirang TV, and it leaves a strong impression. It presents Jeju both as a place of natural beauty and cultural richness, and as a global city with advanced education and technology infrastructure.

Jo *seok

48p

Reading about the volunteer work of the JDC Dream Sharing Volunteer Corps brought a smile to my face, especially during the cold winter season. It reminded me that JDC is an organization that works not just for development, but for the well-being of the community. I hope JDC continues to stand alongside residents and grow as an organization trusted by the people of Jeju.

Park *suk

Even in the middle of the bitter winter, the news that food packages were delivered to 420 households was deeply moving. I was especially impressed that the program supported the local economy by purchasing locally produced agricultural products for donation while also putting the values of community into practice. The various initiatives supporting vulnerable groups, including people with disabilities and older residents, are equally meaningful. When warm hearts come together in this way, I believe they help make our society brighter and more hopeful.

Han *hee

It is encouraging to see JDC taking part in meaningful community giving. I hope the organization will continue working closely with local communities and fulfilling its social responsibilities so that Jeju can grow into an even warmer place for everyone. In particular, I hope these initiatives remain connected to the community over the long term, reaching the places where help is truly needed, listening to voices from the ground, and ensuring that practical support reaches those who need it most. I look forward to seeing many more social contribution initiatives in the future.
