WITH THE ROYAL AZALEAS**

COVER.  
**ROYAL AZALEAS AT WITSE OREUM,  
HALLASAN MOUNTAIN**

Ascending  
Witse Oreum  
one step at a time

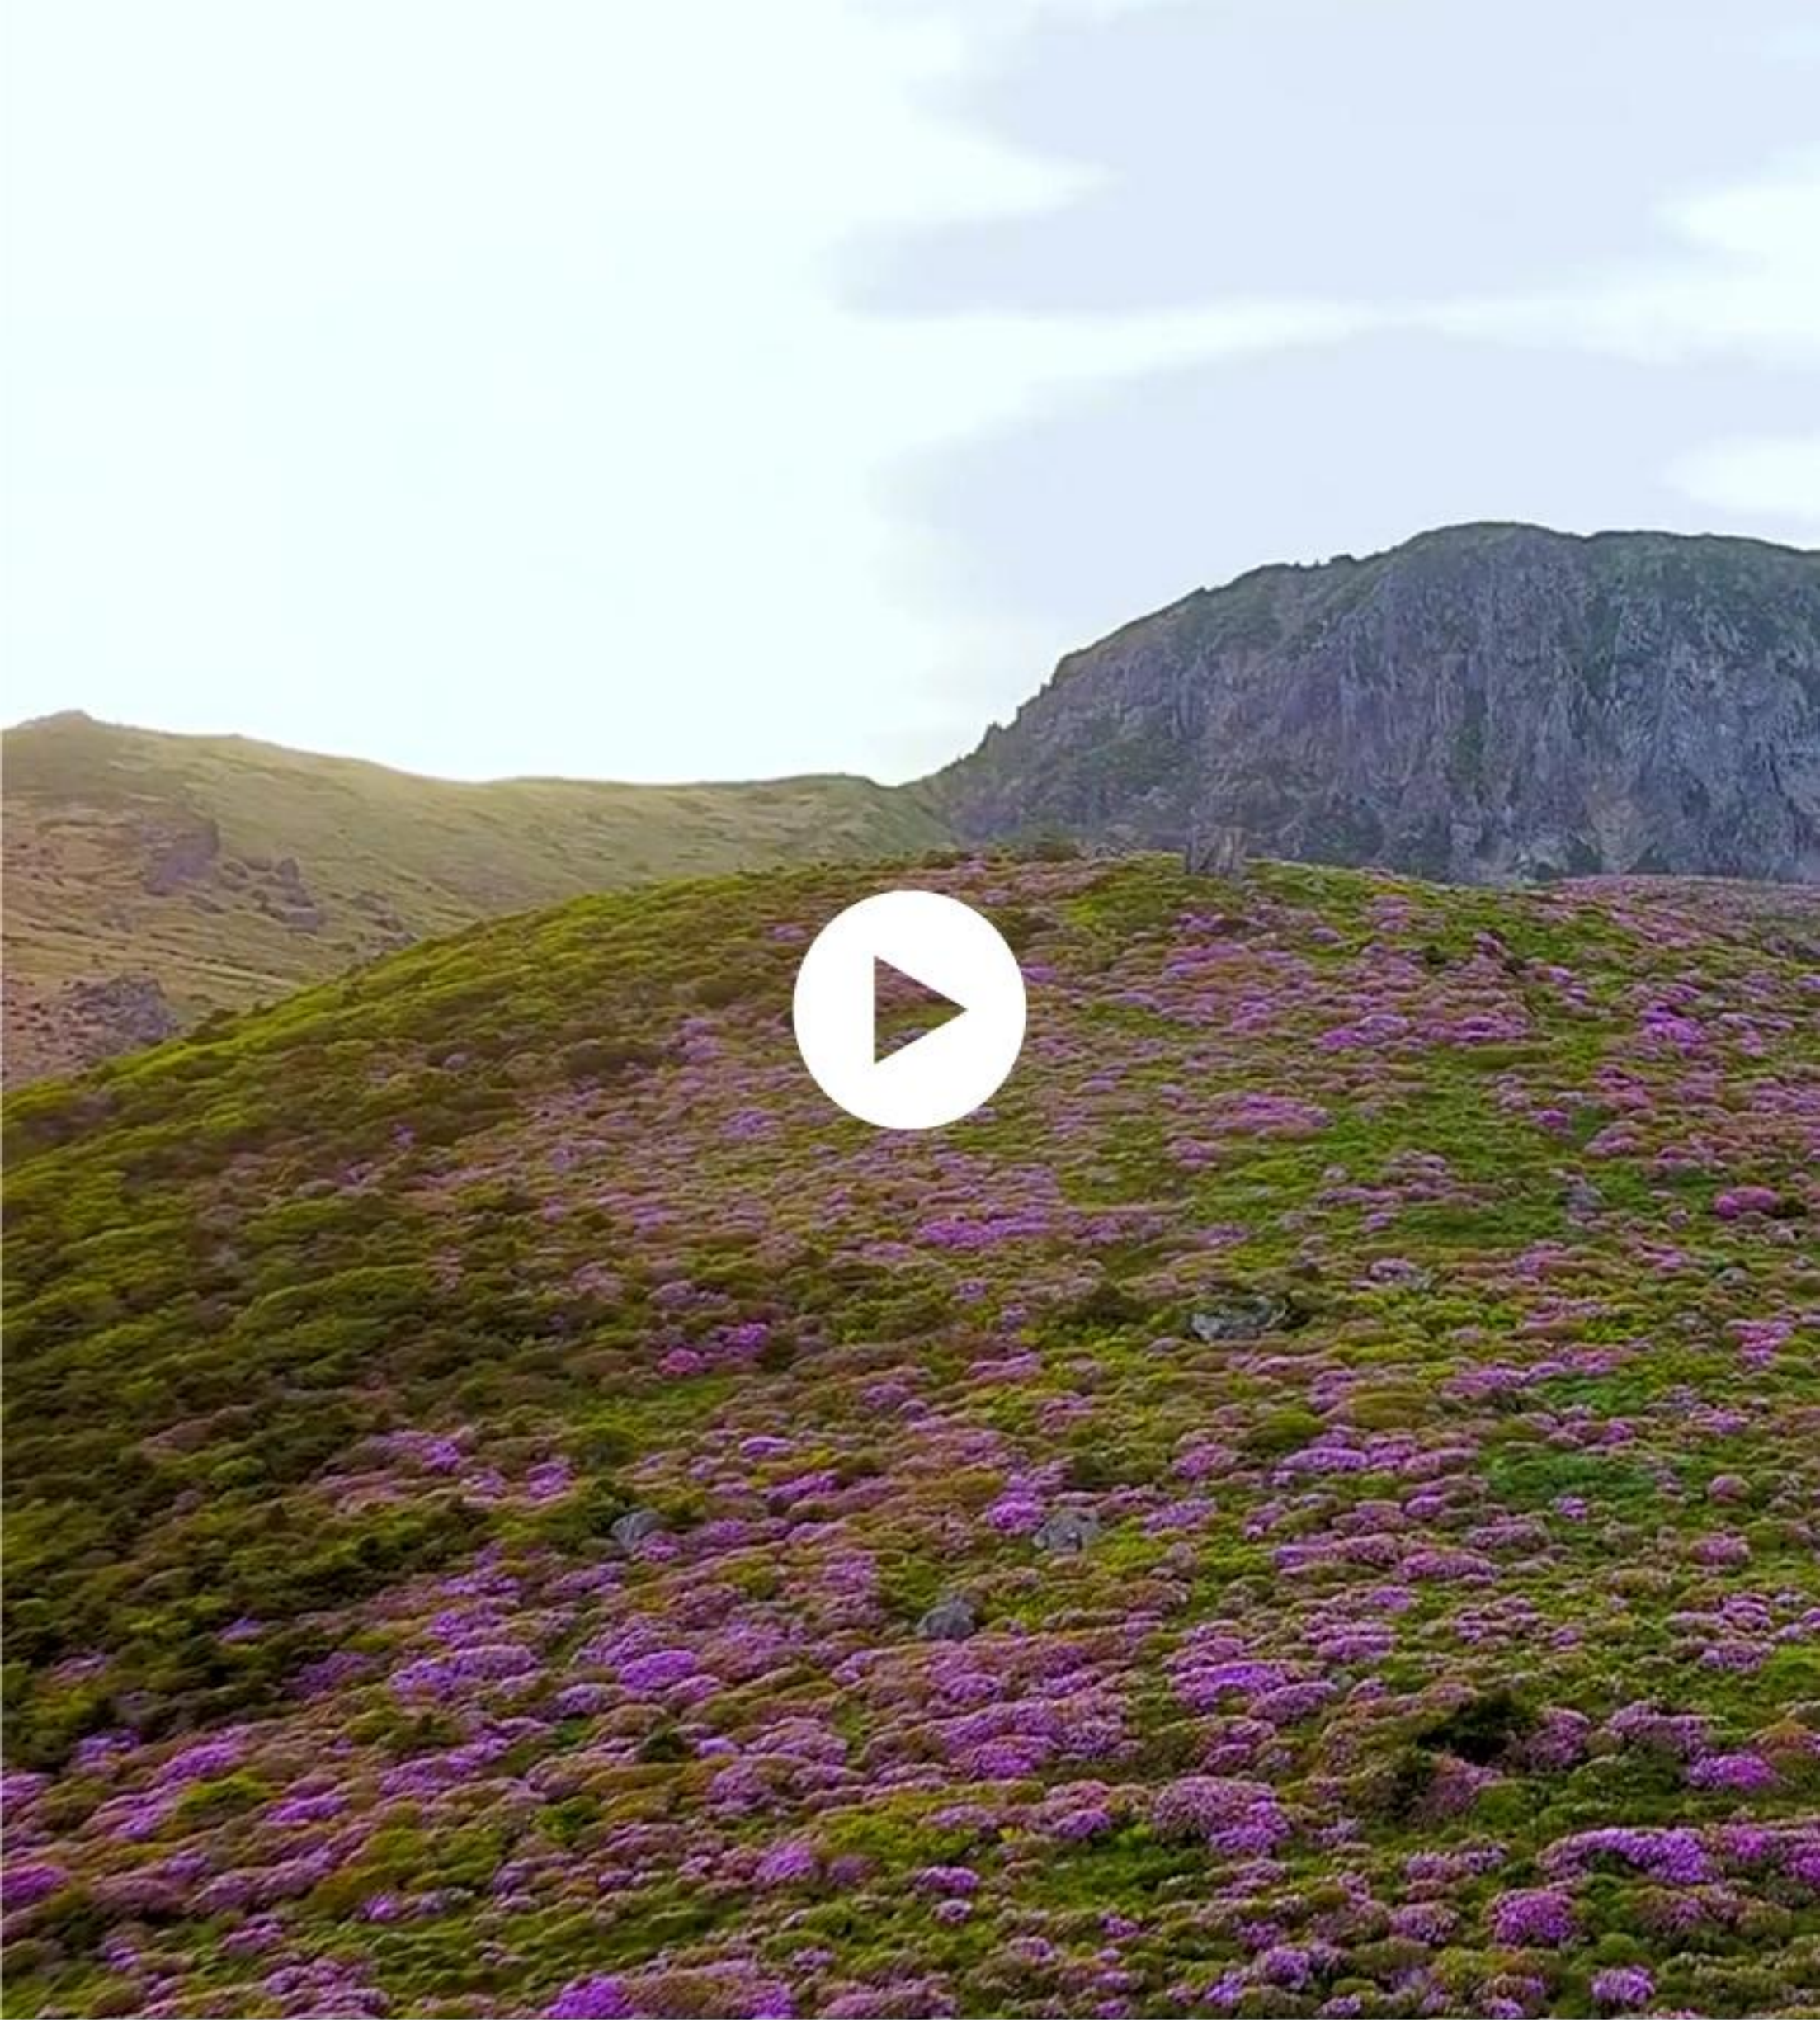

Azaleas wait at every bend to welcome me

I embrace the crimson greeting

Offered by Hallasan in the heart of May

I never walked this path alone  
The wind, the clouds, and the flowers

Followed the ridge right beside me  
As we crossed May's Hallasan together

## JDC MAGAZINE

MAY 2026

**Dream of Jeju**, the official digital magazine of the Jeju Free International City Development Center (JDC), returns with a focus on Jeju’s Potential: In Full Bloom. Published to realize our vision of a Free International City, this issue arrives as we celebrate JDC’s 24th anniversary. Inside, we share the vibrant stories coloring our spring. Labor Union Chairman Seo Ju hwan shares his blueprint for a healthy organization, while the Jeju Aerospace Museum introduces new sign language videos and real time multilingual services to create a barrier free universe. We also cover the historic groundbreaking of the Fulton Science Academy Atherton (FSAA) in the Jeju Global Education City.

JDC is dedicated to building an international city where sustainable growth and harmony coexist. As a public corporation under the Ministry of Land, Infrastructure and Transport, we continue to elevate our core sectors in tourism, education, healthcare, and high-tech industries. We remain committed to discovering new ventures that will strengthen the foundation for Jeju’s future growth.

## JDC's 10-Year Blueprint for 100% Renewable Energy

### JDC Establishes Mid- to Long-Term RE100 Implementation Strategy and Action Plan

JDC has established its Mid- to Long-Term RE100 Implementation Strategy and Action Plan, setting a target of achieving 100% renewable energy use by 2035. In line with Jeju Province's goal of achieving its 2035 Carbon Neutrality Vision ahead of schedule, the plan represents JDC's commitment to pursuing a phased energy transition tailored to the characteristics of its diverse business sites, including its headquarters, museum, and duty-free shops.

## JDC Steps Up to the RE100 Starting Line in the Era of Carbon Neutrality

Around the world, the expansion of renewable energy is accelerating to achieve carbon neutrality targets. As more companies take part in RE100, standards are also becoming more stringent to ensure greater transparency and traceability in power procurement. Through its 123 National Policy Agenda, announced on September 16, 2025, the Korean government identified climate crisis response and a sustainable energy transition as key policy directions and is pursuing a renewable energy-centered energy transformation as a key task.

Jeju Province has also taken the lead in the energy transition. In May 2024, the province announced its 2035 Carbon Neutrality Vision, and in October of the same year, it was designated as a leading demonstration site for achieving carbon neutrality. In October 2025, Jeju formed the 2035 Jeju Carbon Neutrality Consultative Body with the Ministry of Climate, Energy and Environment and began full-scale implementation of policies to accelerate the energy transition with the goal of achieving carbon neutrality ahead of schedule by 2035.

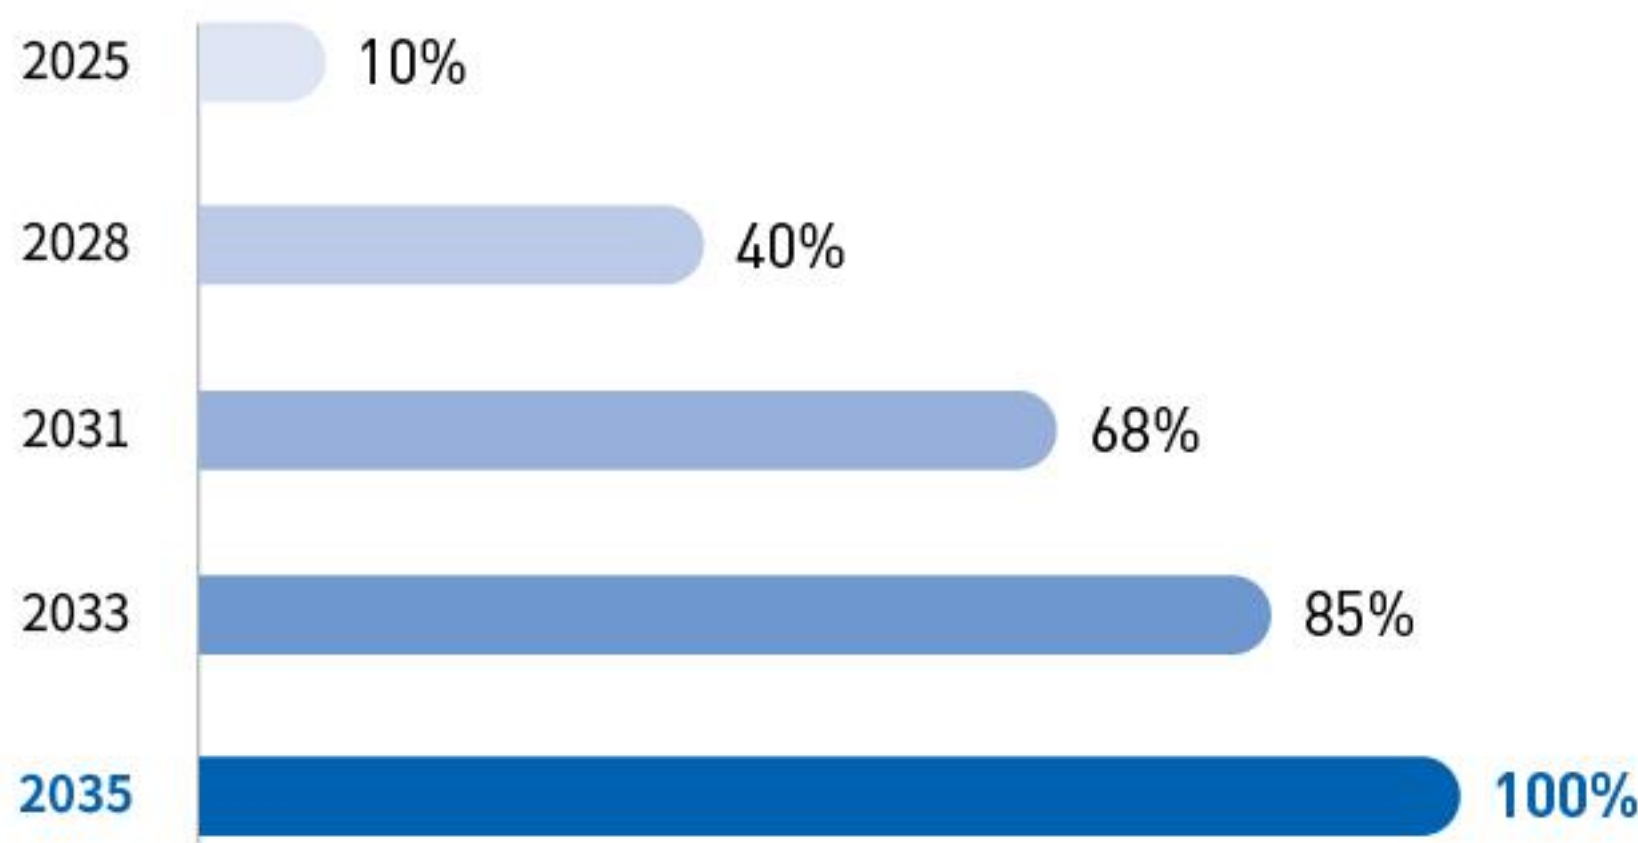

JDC's internal conditions also require a systematic response. Its various business sites, including its headquarters, museum, and duty-free shops, differ in electricity consumption, facility structure, and operational characteristics, making site-specific strategies necessary. In addition, as eco-friendliness and carbon neutrality indicators have become increasingly important in the government's management evaluation, JDC's own energy transition has also become a task that can no longer be postponed.

This Mid- to Long-Term Implementation Strategy was developed by comprehensively reflecting the energy transition policies of the central government and Jeju Province, changes in RE100-related systems, JDC’s facility and operational conditions, and the results of the commissioned project to establish mid- to long-term RE100 implementation measures.

**From 10% to 100%: Five Milestones Toward 2035**

JDC’s RE100 implementation strategy is characterized by its specific annual targets for renewable energy use, set in consideration of Jeju’s regional goals and the Korean government’s Nationally Determined Contribution (NDC) for greenhouse gas reduction. The strategy presents five milestones: 10% in 2025, 40% in 2028, 68% in 2031, 85% in 2033, and 100% in 2035.

This is not a rapid short-term transition, but a realistic roadmap for gradually increasing the share of renewable energy in line with procurement conditions and market circumstances. It is structured to review and supplement the procurement portfolio and operating system at each stage, thereby ensuring both stability and feasibility.

### **Three-Pronged Strategy for Renewable Energy Implementation**

JDC has set an implementation direction to build a stable supply system by diversifying its renewable energy procurement system and improving energy efficiency, while strengthening external cooperation to support the sustainable implementation of RE100. To this end, three core tasks will be pursued together.

The first is renewable energy procurement. In the short term, JDC will secure renewable energy by gradually using the Green Premium system and purchasing Renewable Energy Certificates (RECs), while diversifying its procurement portfolio to respond to market price volatility. In the medium term, JDC will systematize legal and grid reviews, mainly for its headquarters, to expand the conclusion of Power Purchase Agreements (PPAs), and will proceed step by step with consultations with power generation companies and KEPCO. In response to the November 2025 amendment to the Act on the Promotion of the Development, Use and Diffusion of New and Renewable Energy, which mandates solar power systems in parking lots, JDC also plans to gradually establish

self-generation systems based on unused land at its business sites and building structures.

The second is [improving energy efficiency](#). JDC will gradually pursue energy efficiency improvement projects tailored to the characteristics of each facility, including replacing aging equipment and introducing high-efficiency heating, cooling, lighting, and electrical equipment. It will also establish optimal operating strategies that reflect load and seasonal characteristics. In addition, JDC will foster a company-wide culture of energy conservation through programs that encourage changes in employee behavior and regular training, and will also review a participatory incentive system based on departmental energy reduction targets.

The third is [expanding the foundation for cooperation and strengthening external linkages](#). Through this, JDC aims to enhance both the stability of renewable energy procurement and the advancement of its strategy.

## **Building a Renewable Energy Ecosystem Together with Jeju**

Through cooperation with local public institutions, including Jeju Province and Jeju Energy Corporation, JDC will expand the supply of renewable energy and improve procurement stability. It will also identify mutually beneficial cooperation models linked to Jeju's renewable energy industry ecosystem.

#### MOU on Energy Transition between JDC and Jeju Energy Corporation

The goal is to create a structure in which renewable energy produced locally circulates back as electricity used by local public institutions. The scope of external cooperation is also broad. JDC will closely share grid and policy information with relevant institutions, including KEPCO, the Korea Energy Agency, and the Ministry of Trade, Industry and Energy, as well as other institutions pursuing RE100, to strengthen its ability to respond to procurement policies. It will also continue to advance its strategy by analyzing and benchmarking cases of leading RE100 institutions. In addition, JDC plans to lay the foundation for cooperation with private power generation companies and specialized institutions to secure the practical implementation of various procurement methods, including PPAs and RECs.

Jeju is already drawing attention as Korea's leading demonstration site for carbon neutrality. In Jeju, JDC has now presented a full-scale roadmap for RE100 implementation. One can already envision JDC powered by 100% renewable energy in 2035 and contributing to Jeju's green future. 🌿

**Thirteen Years of Steady Steps:  
A Milestone of Mutual Growth  
Opening Jeju's Future**

Seo Ju Hwan,  
Chairperson of  
the Labor Union

---

To the respected people of Jeju, and to the JDC family and fellow union members.

In 2013, we took the first step as a labor union with a small seed of fairness and trust in our hearts. Over the 13 years and 4,745 days since then, we have stood here today, at times facing fierce winds and at other times enduring the scorching sun.

If the labor union in its early days served as a shield protecting the rights and interests of its members, today we have grown into living roots that strengthen the soil so that the great tree called JDC can grow in good health. These 13 years were not simply a time of holding firm, but a valuable process of discipline through which we moved toward maturity and harmony.

The path our union has taken has never been one that pursued only the interests of the organization. We have elevated the vivid voices from the field into reasonable management alternatives, and have continuously presented the right direction for JDC to take as a public institution. We take pride in having established democracy in the workplace, improved unreasonable practices, and helped build a labor-management culture based on mutual respect.

---

---

We have believed that only when employees can focus on their work with stability and peace of mind can the quality of service delivered to the people of Jeju truly improve. That belief has been the driving force that has kept us moving forward without stopping over the past 13 years.

The JDC labor union now looks beyond its own walls to all of Jeju. We will serve as a healthy guardian that provides both oversight and cooperation so that JDC's large-scale projects preserve Jeju's natural value and return benefits to the local community.

We will take the lead in sharing activities that support underprivileged neighbors in the region, and we will fulfill our social responsibilities in fostering local talent and revitalizing the local economy. Jeju's future will become brighter when a public enterprise that the people of Jeju can take pride in stands together with workers who take pride in their work within it.

---

---

The 13th anniversary of our founding is not an end, but a new beginning. We will not rest on our past achievements, and will build solidarity that remains firm even in a rapidly changing management environment. Labor and management will work together to turn crises into opportunities, and we will build a workplace with a virtuous cycle in which the happiness of employees leads to the development of the local community.

Once again, we will remember the passionate resolve we made 13 years ago, and we will not stop walking together with the people of Jeju, growing Jeju's value even further through their trust. This path we walk together with you will lead to a hopeful future for Jeju. 🍃

Sincerely

Seo Ju Hwan

Chairperson of the Labor Union,  
Jeju Free International City Development Center(JDC)

## **An Open Museum for Everyone: Jeju Aerospace Museum**

**Introducing Sign Language Exhibition Guide Videos,  
Real-Time Multilingual Communication Services, and  
a Content Cooperation Agreement with the  
Asia Culture Center Foundation**

Jeju Aerospace Museum is breaking down accessibility barriers for visitors and moving toward becoming a cultural space open to everyone. By providing sign language exhibition guide videos and real-time multilingual communication services, the museum is lowering barriers to viewing its exhibitions. At the same time, it has signed a business agreement with the Asia Culture Center Foundation, further strengthening its content competitiveness.

JAM 제주항공우주박물관 문화체육관광부

## From Sign Language Videos to Large-Print Books: Expanding Accessibility in Detail

Jeju Aerospace Museum was selected for the Ministry of Culture, Sports and Tourism's 2025 Exhibition Information Sign Language Video Production Support Program, and has been providing sign language video guide services for its permanent exhibitions since February 11 of this year. A total of 30 sign language videos have been produced, covering an introduction to the museum, information on exhibition halls, and information on major exhibits. Each video includes audio description and subtitles. Visitors can easily watch the videos by scanning the QR code on the sign language exhibition guide leaflet. Before this, in 2022, the museum worked with the Jeju Special Self-Governing Province Sign Language Interpretation Center to produce sign language guide videos for seven representative exhibits in the

→  
The real-time multilingual  
communication service  
in use at the Jeju Aerospace  
Museum ticket office

Aviation History Hall on the first floor. The museum has also steadily expanded infrastructure to make visits more convenient for visitors with accessibility needs, including the operation of an AI cultural guide robot, the provision of large-print books, and the installation of lifts for mobility-impaired visitors inside the exhibition halls.

## **Beyond Language Barriers: Introducing Real-Time Multilingual Communication Services**

On March 3, real-time multilingual communication services were introduced at the information desk and ticket office of Jeju Aerospace Museum. Supporting multiple languages, including English, Chinese, and Japanese, the system enables real-time interpretation and guidance on site, helping foreign visitors and staff communicate smoothly.

Asia Culture Center Foundation-JDC business agreement signing ceremony

As the number of foreign visitors to Jeju continues to increase, Jeju Aerospace Museum aims to further strengthen its status as an international education and cultural destination by creating an exhibition environment free of language barriers.

## **Adding Digital Art to Aviation and Space : An MOU with the Asia Culture Center Foundation**

On February 19, JDC and the Asia Culture Center Foundation signed a business agreement for Mutually Beneficial Cooperation in Cultural Content at the foundation's multipurpose conference room. Under the agreement, Jeju Aerospace Museum will be able to introduce and use outstanding creative and production content distributed by the Asia Culture Center Foundation. Accordingly, the museum plans to create an exhibition environment where visitors can enjoy a more multilayered experience by combining its existing exhibitions with content in various media.

#### Asia Culture Center Foundation-JDC business agreement signing ceremony

The language of science and technology embodied in aviation and space is expected to be joined by the sensibility of immersive media art and convergence exhibitions.

Jeju Aerospace Museum also stated that it plans to continue strengthening its content competitiveness through cooperation with various public institutions. This cooperation, which brings together cultural creation and production capabilities and Jeju's on-site experiential infrastructure, is drawing attention as a new example of a mutually beneficial model among local public cultural institutions. Through its three-pronged efforts in sign language guides, multilingual communication, and content cooperation, Jeju Aerospace Museum is ultimately moving in one direction: becoming a museum where everyone can encounter the sky and space without barriers of language or disability. These efforts to broaden accessibility and deepen content are expected to provide a richer experience for all visitors to Jeju. 🌊

Nurturing Talent,  
Building the Future

Groundbreaking Ceremony for  
Fulton Science Academy Atherton

On April 28, a groundbreaking ceremony for Fulton Science Academy Atherton (FSAA) was held in Jeju Global Education City. The first global campus of Fulton Science Academy (FSA), the No. 1 STEM private school in Georgia, broke ground in Jeju, marking the start of full-scale preparations for its opening in August 2028. With this milestone, Jeju Global Education City is set to complete its international school cluster and position itself as one of Asia's leading global education hubs.

## Toward Asia's Premier Global Hub for Gifted Science Education

Held at 2:00 p.m. on April 28 under the slogan Nurturing Talent, Building the Future, the groundbreaking ceremony served as an opportunity to present FSAA's vision and blueprint for its opening in August 2028. FSAA is the first global campus of Fulton Science Academy Private School (FSA), a prestigious private school in Atlanta, Georgia. Drawing on the main campus's high-quality curriculum and teacher system, FSAA aims to become Asia's leading global hub for gifted science education. The ceremony was attended by key figures from the U.S. education sector, including David Aiden, Head of School at FSA; Corey Alderdice, Board Director of the National Consortium of STEM Schools (NCSS); Dr. Norman Robinson of Georgia Institute of Technology; Sinsaeng Ko, Vice Provost of Emory University; and Jeff Jackson, President of the Georgia Independent School Association (GISA). They discussed possible areas for future cooperation.

FSA(Fulton Science Academy Private School), the main campus

## Bringing the DNA of a Top 1% U.S. School to Jeju

The main campus, FSA, is a top 1% private school in the United States, recognized for its outstanding educational outcomes and future-oriented educational philosophy. It has been named a National Blue Ribbon School, the highest honor awarded by the U.S. Department of Education, and recently earned further recognition when it was named a 2025 Cognia School of Distinction, an honor granted by Cognia, a global education accreditation organization, to 35 educational institutions worldwide.

FSA's strengths can be summarized in its curriculum specialized in STEM and gifted education, its outstanding teacher operation program, and its wide range of extracurricular activities, or EC activities, that highlight each student's individuality. In particular, all teachers are required to hold a teaching certificate as well as certifications in STEM and gifted education.

The school also operates a whole-person education system designed to maximize each student's potential, ranging from character education to personalized career planning and college admissions guidance.

As a result, 75% of its graduates have gone on to top 50 universities in the United States, including Ivy League schools, and the school has maintained the No. 1 ranking in Georgia for several years in STEM Olympiads, sports, and various other competitions.

## A Blueprint for the 2028 Opening

Since receiving approval for its international school establishment plan in March 2024, FSAA has completed all required permitting procedures, including a building permit in November of the same year and approval of

Aerial rendering of the FSAA campus

the implementation plan for urban planning facilities in February 2025, and is moving steadily toward its opening. Located on a 25,000-pyeong site in Jeju Global Education City, FSAA plans to serve a total of 1,354 students from kindergarten through grade 12. The campus, with a total floor area of approximately 17,000 pyeong, will include a main building, an academic building with an Innovation Lab for STEM education, an art center with state-of-the-art sound facilities, a sports center, student dormitories, teacher residences, and other facilities. The campus master plan was designed by Perkins Eastman, a U.S. architecture firm that has designed approximately 600 international schools around the world, creating a school campus that meets the highest standards in both function and design.

Going forward, FSAA plans to begin with an online school information session in the third quarter of this year, followed by an official admissions information session and entrance test in August 2027, before opening in August 2028. Through the same recruitment and management system, including teachers dispatched from the main campus, as well as a teacher rotation program between the two schools and joint training, FSAA will maintain a teaching staff at the same level as the main campus. Students will also have access to the same STEM curriculum and EC activities as those offered at the main campus.

With FSAA breaking ground, Jeju Global Education City's blueprint for becoming a global education cluster in Northeast Asia is moving one step closer to reality. 🌊

**Dear Prospective Students and Parents,**

Hello.

I am David Aiden, Head of School at Fulton Science Academy (FSA) in the United States.

I am truly pleased to establish FSAA, FSA's first global campus, in Korea, a country leading global innovation in advanced industry and culture through semiconductors and K-culture.

The Atlanta area in Georgia, where FSA is located, is home to global corporations and high-tech companies and is often called the Silicon Valley of the southeastern United States. Many Korean companies have also established operations and made significant investments in the region, making Atlanta one of the U.S. cities with a large Korean community.

The growing business exchange and deep trust between Georgia and Korea have now led to a new chapter of cooperation in education and talent development through the establishment of FSAA, FSA's global campus, in Jeju.

FSA, the No. 1 STEM private school in Georgia, is widely recognized as a leading success model for STEM education in the United States. Based on character education represented by ICARE, FSA develops well-rounded students with both character and academic strength through a STEAM curriculum that combines top-level STEM education with the humanities and the arts.

FSA also cultivates outstanding teachers capable of providing gifted science education through its teacher operation system.

FSA is committed to fully sharing its educational philosophy, experience, and accumulated know-how to help realize FSAA's vision of becoming Asia's leading global hub for gifted science education. From the moment your child becomes part of FSAA, we will take your child's potential seriously. We will walk alongside each student so that they can discover their dreams and vision and work toward making them a reality.

We invite you to join us on this journey.

We sincerely hope that your child's potential will flourish at FSAA.

We look forward to seeing you in Jeju.

Thank you.

David Aiden

## **A Large Circle Drawn Together : JDC Community Support Project, Happy Goodball**

**A Lifelong Health Care Program for Families of  
People with Developmental Disabilities,  
Led by JDC and Haengbokhage Social Cooperative**

With support from JDC, Haengbokhage Social Cooperative operated the Goodball Method for Lifelong Health Care for Jeju Families of People with Developmental Disabilities, completing a total of 27 sessions from last fall through this spring. The program brought together children and adolescents with developmental disabilities and their families. Through the use of a round Goodball, which gently helps relieve imbalances in the body, the program is helping embrace the community of families of people with developmental disabilities in one large circle.

## **JDC Steps in to Fill a Gap in Health Care for Families of People with Developmental Disabilities**

Since 2023, Haengbokhage Social Cooperative has operated physical health programs using Goodballs for people with developmental disabilities and their families. Participating parents reported positive effects, including relief from physical pain, improved sleep, and emotional stability, and satisfaction with the program was very high. However, due to budget limitations, the program was suspended after the second half of 2024, creating a gap in continued health care support for families of people with developmental disabilities.

People with developmental disabilities often experience postural imbalances, reduced musculoskeletal function, and pain, while also facing difficulty expressing or correcting these issues on their own. Existing treatment and education services, however, had limitations in supporting the recovery of the health of the family as a whole and strengthening family bonds. In addition, families of people with developmental disabilities are exposed to chronic physical and emotional stress as well as social isolation, making an integrated, family-based recovery program urgently needed. With JDC stepping in to help fill this gap, the Lifelong Health Care Goodball Method program was newly designed so that families of people with developmental disabilities can practice it regularly at home.

## The Goodball Method: Gentle Support Through Low-Intensity Exercise Based on Anatomical Principles

At the heart of this project is the Goodball Method, a low-intensity exercise method based on anatomical principles. It is considered an effective tool that helps children with developmental disabilities learn and build habits around breathing exercises, body awareness, and posture correction without resistance. Through 40 Goodball Points for the upper body, lower body, sleep, and anti-aging, participants learned to better understand their bodies and develop the ability to care for themselves.

## **A Large Circle Drawn Together : JDC Community Support Project, Happy Goodball**

**A Lifelong Health Care Program for Families of  
People with Developmental Disabilities,  
Led by JDC and Haengbokhage Social Cooperative**

The program pursued four goals: strengthening the self-care capacity of children with developmental disabilities; supporting emotional stability and recovery for parents and families; promoting community bonds and expanding social relationships; and realizing sharing and giving back to the local community.

**From Learning to Play and Sharing: 27 Sessions Together**

The program was designed as a carefully structured journey in three stages, with a total of 27 sessions and approximately 500 cumulative participants.

| Category     | Period          | Main Activities                                                                                                                                                | Sessions |
|--------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Early phase  | 11/25<br>-12/25 | <b>Goodball Method education and application</b> , including 40 Goodball Points and LSRB theory                                                                | 14       |

## From Home to Community: A Growing Circle with Families of People with Developmental Disabilities

Families of people with developmental disabilities participated as volunteers, introducing Goodballs to the local community. A special lecture for Jeju residents also helped create a natural opportunity to build public understanding of developmental disabilities. The program also provides home training materials and visual resources, helping families continue the practice at home even after the program ends. In this sense, the name Lifelong Health Care is well deserved.

The program served more than 50 participants, including people with developmental disabilities, their families, and related professionals. In addition, approximately 90 group participants are expected to take part in the community sharing program and special lecture.

The program also has the potential to be adopted and expanded in the future by welfare centers, day activity centers, residential facilities, vocational facilities, and other organizations in Jeju.

Happy Goodball, created together by JDC and Haengbokhage Social Cooperative, has helped families of people with developmental disabilities care for one another and return to a healthier daily routine, allowing that circle of care to extend to neighbors and the wider community. JDC will continue to support the warmth that one small ball brings to families of people with developmental disabilities in Jeju, and the future in which that warmth spreads throughout the local community. 🍊

Where Petals Dance  
and Spring Whispers,  
JDC Community Support Project  
**Yerae Saja Village**  
**Spring Festival**

예래사자마을에 봄이 찾아왔다.

JDC 도민지원사업의 지원을 받아 진행된 ‘예래사자마을 봄을 춘다 with JDC’ 프로그램이 지난 4월 4일과 5일 이틀에 걸쳐 예래생태공원 일대와 상예1마을 로컬가든 유채꽃밭에서 펼쳐졌다. 제3회를 맞은 예래사자마을 봄꽃나들이는 마을 주민들이 직접 기획하고 손님을 맞이하는 주민참여형 축제로, 봄꽃과 생태·문화·공동체가 한자리에 어우러졌다.

### 오랜 침묵을 딛고, 마을이 봄을 부른다

상예1마을회는 예래생태공원, 군산오름, 주상절리, 제주올레 8코스 등 마을이 품은 자연·문화·역사 자원을 발판 삼아 청소년 교육과 주민참여 프로그램, 크고 작은 활동을 이어오며 마을의 안녕과 발전을 위해 힘써 왔다. 예래사자마을 봄꽃나들이는 그 흐름 속에서 태어난 종합 콘텐츠다. 상예1마을 주민들은 마을의 이야기를 직접 발굴하고 건네며 봄 한가운데에 섰다.

### 유채꽃밭에서 쿠키클래스까지

축제의 중심에는 약 1만 평(33,000㎡) 규모의 상예1마을 로컬가든 유채꽃밭이 자리한다.

Spring Flower Exploration Program

## From Canola Fields to Cooking Classes

At the heart of the festival was the canola flower field at the Local Garden in Sangye 1 Village, spanning about 10,000 pyeong, or 33,000 square meters. The field was sown by local residents in early October last year, who also created walking paths and photo spots. In full bloom this spring, it has become a new face of the village, welcoming visitors.

At Daewangsucheon Stream in Yerae Ecological Park, local docent guides trained as village samchun, or community elders, led the Spring Flower Exploration Program in teams of two with assistant instructors. Walking with visitors along spring-fed streams and forest paths, they shared stories about trees and plants and led ecology-based play activities.

Family Cooking Class

## A Single Flower Reconnects a Village

The Yerae Saja Village Spring Flower Outing is also part of the village's own process of renewal. Local youth completed preliminary training on resource circulation and took part as environmental volunteers. On April 5, Arbor Day, children, families, visitors, and local residents planted flowers together, contributing to the creation of a more climate-conscious environment. It was a time of comfort and encouragement for both visitors and residents.

Through this event, Yerae Saja Village has strengthened its identity as a restorative ecotourism village suited to the wellness era, while taking pride in helping lead and practice Carbon Neutrality 2050, a goal shared by the global community. This spring, together with JDC, Yerae Saja Village brought spring back to its community, like a single flower coming into bloom. 

# Yerae Saja Village Spring Festival

## Dates

Saturday, April 4 - Sunday, April 5, 2026

## Venue

Yerae Ecological Park area and the canola flower field  
at the Local Garden in Sangye 1 Village,  
around 638 Sangye-dong, Seogwipo-si

## Main Programs

- ✿ Canola Flower Field Photo Zone ✿ Daewangsucheon Stream Spring Flower Exploration Program at Yerae Ecological Park ✿ Family Cooking Class
- ✿ Children's Spring Flower Drawing Contest ✿ Spring Flower Plogging
- ✿ Flower Planting for Climate and Environmental Improvement
- ✿ Saja Village Happy Table ✿ Yerae-On Village Café
- ✿ Hands-on Activities and Presentations by Small Community Groups

## Hosted and Organized by:

Sangye 1-dong Village Council

Sponsored by: JDC

## The Starting Point for Trusted Cooperation Non-Disclosure Agreements (NDAs)

Business cooperation goes beyond simple transactions.

It often involves the exchange of ideas, technologies, and information.

This is especially true for projects carried out jointly by public institutions and private companies, where various types of sensitive information may need to be shared. If such information is not properly protected, both company's competitiveness and the cooperation itself may be put at risk.

For this reason, JDC requires the signing of **non-disclosure agreements (NDAs)**, a key tool for protecting information exchanged between companies, in accordance with its Contract Procedure Guidelines for Shared Growth with Small and Medium-Sized Enterprises.

In practice, however, many companies do not have sufficient awareness of NDAs. As a result, some companies provide confidential information without first requesting an NDA. JDC is therefore introducing the need for and importance of NDAs to help build a healthier shared-growth ecosystem.

## What is an **NDA**?

A non-disclosure agreement (NDA) is a contract that restricts the disclosure to outside parties or use for unauthorized purposes of technical, management, business-related, and other information learned in the course of business cooperation between companies.

Simply put, it is an agreement to protect important information learned through cooperation. An NDA is not just a formality.

It is an important tool for protecting a company's core assets.

For small and medium-sized enterprises in particular, technology and ideas are often at the heart of their competitiveness, making information protection directly connected to business survival.

## ⑥ Black Tea Advanced Age Renewal Eye Concentrate 15ml

An anti-aging eye cream powered by BT Matrix™ with retinol-like benefits. It visibly improves the appearance of dark circles by 8x, helps firm the skin around the eyes, and smooths the look of fine lines.

## Why JDC Requires **NDA**s

JDC works with a wide range of companies to support the sustainable growth of Jeju's regional economy and industrial ecosystem. In this process, JDC places importance not only on contractual relationships, but also on shared growth based on trust. To this end, JDC applies the following principles when entering into contracts:

- Requiring NDAs to protect information shared between companies
- Providing advance guidance on NDA-related matters at the contract stage when corporate confidential information needs to be shared
- Clarifying standards for the protection and use of information during cooperation

These are not mere administrative procedures. They are essential safeguards for protecting the rights of partner companies and creating a fair business environment.

## Request an **NDA** Review Before Sharing Information

One situation that often occurs in practice is the assumption that if a public institution does not mention an NDA, there is no need to request one. However, an NDA is not about who requests it first. It is a necessary basic procedure. If important information is shared without an NDA in place, it may be difficult to receive protection if a dispute arises later. For this reason, it is best to sign an NDA from the early stages of cooperation between companies.

### How to Use **NDA**s

If your company is considering cooperation or transactions with JDC, please keep the following in mind:

- Sign an NDA before sharing important information, such as business proposals or technical explanations
- Carefully review the NDA terms provided during the contracting process
- Proactively request an NDA when needed

## Trust Begins with Clear Agreements

Healthy cooperation begins with trust. That trust becomes stronger when it is supported by clear standards and commitments.

Going forward, JDC will continue to place fairness, transparency, and trust at the center of its cooperation with companies, while steadily strengthening the institutional foundation for shared growth.

If companies also recognize the importance of NDAs and make active use of them, a safer and more reliable environment for cooperation can be created.

Take the first step toward trusted cooperation with an NDA.

2025년 공공기관 고객만족도 조사

# 공공기관 고객만족도 조사 2년 연속 공기업 1등

- **JDC Launches Business Strategy Research for Building Regional AI Infrastructure and an Industrial Ecosystem**  
Expert-Led Jeju AI Infrastructure and Industrial Ecosystem Research Group Begins Work

On April 20, JDC launched the Jeju AI Infrastructure and Industrial Ecosystem Research Group. The group was formed to support the development of the new Jeju AI Data Center project and brings together JDC employees with expertise in AI and external experts. Through this research group, JDC plans to strengthen its expertise in AI infrastructure and industrial ecosystem development, including AI data centers, and explore actionable business strategies.

The group's main research areas include policy alignment, carbon-neutral models, the role of the public sector, and the creation of a demonstration ecosystem. It is expected to develop measures to help Jeju grow into a new regional hub for Korea's national AI industry.

JDC has continued to review the Jeju AI Data Center project based on national policy tasks. After completing the basic concept in 2025, JDC is currently conducting a preliminary feasibility analysis and held a service report meeting on April 20. Going forward, JDC plans to develop a practical business model through demand surveys and verification of the business structure.

At the Jeju Town Hall Meeting on March 30, a public-led 40 MW AI data center project was proposed. JDC is actively pursuing business cooperation with Jeju Province and Jeju Technopark in line with Jeju Province’s policy direction for a carbon-neutral, eco-friendly AI data center.

In addition, to promote systematic business cooperation, JDC plans to jointly establish a regional AI consultative body with Jeju Province and Jeju Technopark, involving industry, academia, and research institutions, to strengthen project governance.

AI is core infrastructure that can determine national competitiveness and an important foundation for securing regional industrial competitiveness. JDC therefore plans to use this research group to closely review its strategy for building an AI data center and help create momentum for revitalizing Jeju’s AI-based industrial ecosystem.

## **New Standing Auditor**

### **Kang Seong-min Takes Office**

#### **Brings Strong Understanding of Local Government and Public Policy**

On April 14, Kang Seong-min took office as JDC's new Standing Auditor. Kang is an expert with extensive experience in administration and policy, and is expected to further strengthen JDC's audit function based on his strong understanding of local government and public policy.

Kang Seong-min graduated from the Department of Public Administration at Jeju National University and the Department of Economics at Korea National Open University. He also completed coursework at the Graduate School of Social Welfare and Clinical Therapy at Jeju International University. He has served as an expert member on autonomy and decentralization under the Presidential Committee for the Regional Era, an advisory member on regional depopulation response under the Speaker of the National Assembly, and a member of the 11th Jeju Special Self-Governing Provincial Council, among other roles.

Kang Seong-min stated, "I will further strengthen JDC's integrity and public service role through preventive auditing and stronger internal controls. I will also establish an audit system that meets public expectations and conduct audits that contribute to balanced development, future growth, and public livelihoods and safety in the era of popular sovereignty."

JDC's Standing Auditor is appointed by the Minister of Economy and Finance. Kang Seong-min's two-year term runs until April 13, 2028.

## Vehicle Handover Ceremony Held for Welfare Facility Specialized Vehicle Support Project

### Specially Modified Vehicles Delivered to Improve Mobility for People with Disabilities and Older Adults

On April 23, JDC held a vehicle handover ceremony for two social welfare facilities in Jeju. The vehicles are specially modified to improve mobility for people with disabilities and older adults. The recipient organizations were selected through an evaluation process following an open call held in September 2025 for social welfare corporations, facilities, and organizations in Jeju. The two selected organizations are Bethel and Yedam Senior Care Nursing Home. JDC began providing general vehicle support in 2012 and has continued the Welfare Facility Specialized Vehicle Support Project since 2013. To date, the project has provided vehicles worth a total of approximately KRW 1.6 billion to 47 organizations, helping ensure mobility rights and improve welfare for transportation-vulnerable people in Jeju. JDC's Welfare Facility Specialized Vehicle Support Project is one of its major social contribution initiatives. It is carried out on an ongoing basis to help ensure mobility rights and expand opportunities for social participation for transportation-vulnerable people in Jeju. JDC continues to provide support in various areas to help build a local community where all residents can live together in happiness. In 2026, JDC plans to carry out a range of social contribution projects, including the JDC Welfare Facility Specialized Vehicle Support Project, the Community Support Project proposed and identified by Jeju residents, and the Jeum Job Project, a participatory employment project for groups facing barriers to employment, such as older adults and people returning to work after a career break.

- Business Agreement Signed with Tokyo Kiraboshi Financial Group and BNK Financial Group to Support Startups’ Global Expansion and Investment Connections**  
**First Outcome of Three-Way Cooperation in Global Investment**

On April 20, JDC signed a business agreement at its headquarters with Tokyo Kiraboshi Financial Group and BNK Financial Group to support the global expansion and investment connections of companies based in Jeju Advanced Science and Technology Park and Route330. The agreement was signed to help the three institutions jointly provide financial support and local partnership networks needed by promising high-growth companies discovered and nurtured in their respective regions as they enter overseas markets.

The main areas of cooperation include support for global expansion, joint discovery and development of companies with innovative technologies, financial consulting and access to local office infrastructure, and stronger networking and information exchange.

Under the agreement, the three parties plan to jointly pursue various cooperation programs, including providing local market information and consulting on corporate establishment for companies seeking overseas expansion, mutually recommending and jointly developing promising technology companies, connecting companies with financial services and local bases, and holding joint demo days and investment consultation meetings. In the second part of the event that day, a four-party strategic business cooperation MOU was also signed to support the business expansion of Megaplan, a Route330 resident company. The MOU was signed among Megaplan, Vietnam's Tan Long Group, Tokyo Kiraboshi Financial Group, and BNK Financial Group. This four-party MOU is the first implementation case of the cooperation among JDC, Tokyo Kiraboshi Financial Group, and BNK Financial Group. It is meaningful in that it gave concrete shape to the possibility of Megaplan's global business expansion and overseas investment connections. Megaplan is a Route330 resident company fostered by JDC and has land-based smart aquaculture technology in Jeju. With this agreement, the company plans to begin full-scale reviews of overseas investment and global business cooperation. The agreement is expected to create a new opportunity for companies based in Jeju Advanced Science and Technology Park and Route330 to enter overseas markets, including Japan and Southeast Asia. JDC plans to continue strengthening its role as a public platform that connects investment, finance, and global networks.

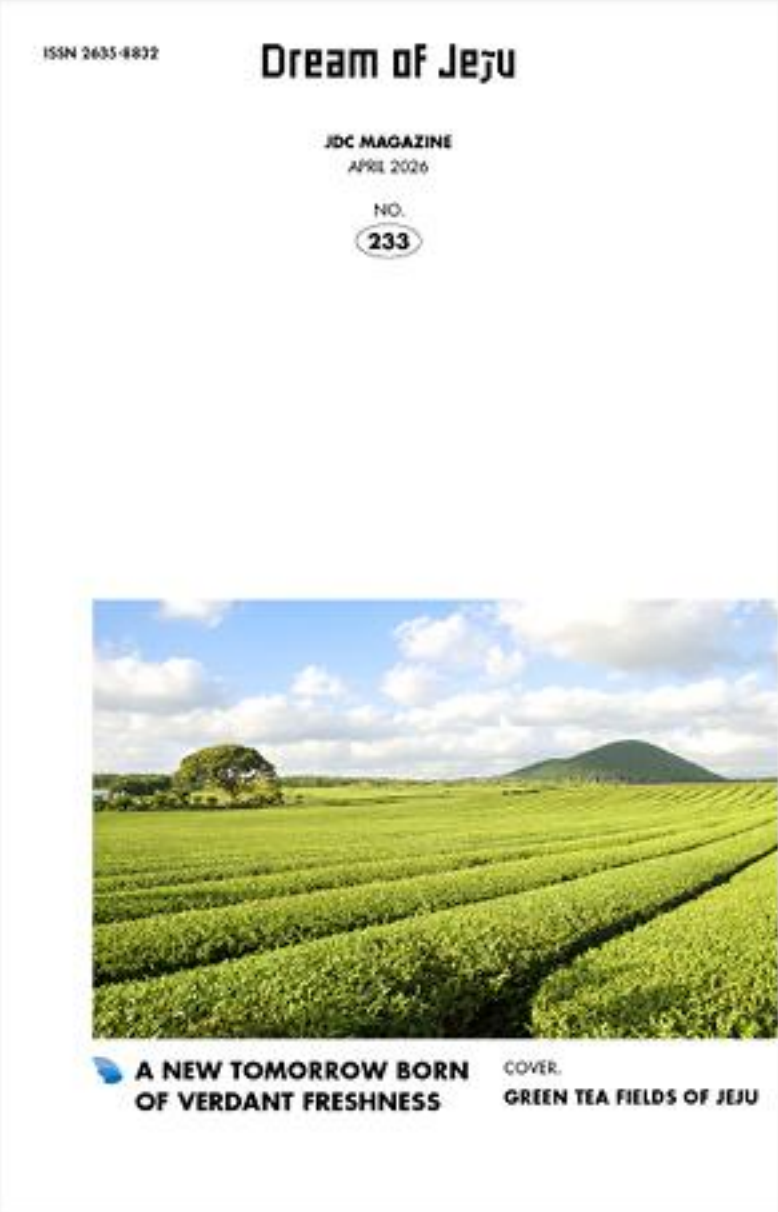

The institutions participating in the agreement are leading organizations in their respective regions with capabilities in finance and corporate growth support. Tokyo Kiraboshi Financial Group is a Japanese financial group with about 160 branches in the Tokyo metropolitan area through its core subsidiary, Kiraboshi Bank. It has capabilities in corporate growth consulting and financial support for overseas expansion, and also provides links to Asian markets through its local base in Ho Chi Minh City, Vietnam, Kiraboshi Vietnam. BNK Financial Group, based in Busan and Gyeongnam, operates corporate finance and startup growth support programs, while also providing financial support and investment connections for small and medium-sized enterprises and mid-sized companies. Tan Long Group is one of Vietnam's largest agricultural trading and processing companies. It has expanded mainly in rice, livestock, and pig farming, and has recently broadened its business into food, energy, and distribution.

Dream of Jeju April 2026 Issue

Dream of Jeju  
April issue

Kim \*A

I really loved this issue’s cover photo. The sunlight seemed to flow down along the rows, and the whole mountainside looked like it was rippling in green. In Jeju’s April green tea fields, the tender young leaves seemed to wake wherever the spring rain had passed. Thank you for giving us a moment to breathe with nature in the freshness of the season and start the day calmly.

Park \*Young

What stood out to me about the April issue was how clearly it introduced various policies and projects focused on Jeju’s sustainable development. The interviews and field stories that emphasized working together with local residents also felt realistic and made the issue more memorable.

Shin \*Won

12p

I was glad to learn that a film about the Jeju 4·3 Incident is being released. It is easy to forget that behind Jeju’s bright and beautiful image, there is also a painful history. With Yeom Hye-ran’s acting, which needs no explanation, and director Jung Ji-young’s perspective, I plan to go to the theater to watch “My Name.” I also applaud JDC for supporting activities in so many different fields.

### Sharing the Poignant Beauty of Jeju with the World

Interview with Director Chung Ji-young

With its official invitation to the Berlin International Film Festival, *My Name* has brought the story of the Jeju 4.3 Incident to the global stage. Director Chung Ji-young captures the historical wounds hidden within Jeju's natural beauty, delivering a powerful message of healing, reconciliation, and peace. We sat down with Director Chung, who masterfully rendered Jeju's beautiful landscapes and barley fields on screen, to discuss the significance of the film and the history that inspired it.

#### Please introduce yourself.

I'm Chung Ji-young, and I direct films. This latest project began when I came across a screenplay that won a competition hosted by the Jeju 4.3 Peace Foundation. With the generous support of JDC, I was able to bring that story to the screen.

#### What specific elements of the Jeju 4.3 Incident were you most determined to capture in this film?

When I first read the screenplay, I was struck by a single, powerful motif: the story of a woman who has lost her name and her journey to reclaim her true identity. Beyond the historical suffering and ideological conflicts, I saw a protagonist who is simultaneously a perpetrator and a victim, wandering in search of her essence. This grueling process felt like a mirror to the bloody reality of the Jeju 4.3 Incident itself, which still drifts without an official name and has yet to achieve its proper designation. I have always found Jeju heartbreaking, even before we started filming. However, I believe many people visit without realizing that the agony of 4.3 is woven into that very landscape. Once you recognize that pain, you realize that Jeju's beauty is actually quite poignant. I took great care to capture that haunting, sorrowful atmosphere on screen.

35

## Lee \*Ri

This issue felt a little heavy because it showed both Jeju's warm spring and the painful history of the 4.3 Incident. Still, I was glad to hear that a film has been made to help share the story of the 4.3 Incident more widely, and that it will be released soon. I will definitely go see it in a theater. Whenever I read *Dream of Jeju*, I like seeing how people are working in many different ways for Jeju's development.

## Park \*Beom

Director Jung Ji-young's perspective on sharing Jeju's painful history with the world felt very warm to me. I hope her work as an artist, bringing forgotten memories back through film and offering comfort to those who were hurt, will help make Jeju's tomorrow brighter.

## Hong \*Pyo

20p

I really liked director Jung Ji-young's interview about "My Name." Her reflection that the film "resembles the bloody reality of the Jeju 4.3 Incident, which has drifted without an official name because it has not been given its proper name" really struck a chord with me. I hope more people will learn through the film that JDC is making efforts in many ways to share Jeju's pain with the wider public.

## Jang \*A

24p

Seeing the "Eomeong Running Crew" running with energy along the roads of Jeju, I felt the healthy vitality of everyday life. Watching them shake off the fatigue of housework and parenting, focus on their own breathing, and encourage one another gave me such positive energy too.

## Kim \*Jin

Running is well known to be good for your health, and it has become popular nationwide. In that sense, I was impressed to see how active the Eomeong Club is. Mothers can easily neglect their own health while focusing on raising their children, so it was nice to see them come together to stay healthy and build bonds with one another.

Hybrid | 1st Level, Global

Written by the Editorial Team

### Welcoming Jeju's Spring One Step at a Time Jeju Eomeong Running Crew

In the early morning light of the Jeju Global Education City, a group of mothers gathers to run through the island's crisp, fresh air. Known as the Jeju Eomeong Running Crew, these women have found a new rhythm in their daily lives. While starting such a journey alone might have been daunting, running side by side has given them the joy and endurance to keep going much longer than they ever imagined.

34

#### When Mothers Run, a Community Is Born

"Eomeong" is the Jeju dialect word for mother. Composed of parents from international schools in the JDC Global Education City, the Jeju Eomeong Running Crew carries the stories of Jeju and its mothers in its very name.

The crew began modestly with Chairperson Lee In-a running on her own. Over time, others joined her by chance. Realizing that many parents shared a reluctance to run alone, she posted a recruitment notice on a parent forum, which led to the official formation of the group. Since its launch in 2022, the crew has grown into a community of about 50 members. They run together every Friday at 9:30 AM near the Global Education City. The only requirement is being a mother. There are no other conditions or membership fees.

35

## Shin \*Won

I could really relate because I also built up my stamina through running and successfully climbed Hallasan. I was impressed that their activities go beyond running and lead to community service. I hope they continue as a healthy activity for both body and mind.

Jeju Youth Expand Their Horizons in Vietnam

JDC Community Support Program  
: Korea-Vietnam Hondi Gallak

Supported by the JDC Community Support Program and operated by the nonprofit organization Happy Tree, the Korea-Vietnam Hondi Gallak program is gaining recognition as a platform for global growth. Hondi Gallak is a Jeju dialect expression meaning "to go together with joy." Twenty Jeju youth recently traveled to Hanoi and Haiphong to volunteer and explore career paths alongside local peers. Through these challenges in an unfamiliar land, they have returned home ready to take their place on the world stage.

34

JDC Supports Youth-Led Global Competency

In its 2025 community support open call, JDC selected the Jeju Youth Global Competency Program, Korea-Vietnam Hondi Gallak, operated by the nonprofit organization Happy Tree, and provided KRW 45 million in funding. The name "Hondi Gallak" is a Jeju dialect expression meaning "to enjoy together," symbolizing the shared growth of Korean and Vietnamese youth. This initiative is an extension of Happy Tree's youth cultural exchange program that has been active since 2009. Following a high satisfaction score of 95.3 in 2024, the program returned in 2025 with an even more diverse curriculum thanks to JDC's continued backing. The program participants included 20 students from grades 8 to 12 and 3 members, all selected through recommendations from schools and youth organizations. By prioritizing youth from disadvantaged backgrounds, the project provided a rare opportunity for those with limited international experience to build courage and global confidence.

From Workshops to Hanoi  
: A Journey Designed by Youth

During the November 2025 domestic workshop, participants engaged in global citizenship training and designed their own itineraries for Vietnam.

35

All Together School  
Jeju Campus

: Growing with Multicultural and  
North Korean Defector Families

On February 26, 19 migrants from 28 families celebrated their graduation from the All Together School Jeju Campus. Dressed in caps and gowns, they received their certificates of completion, marking a significant milestone in their lives in Jeju. Operated by the Korean Red Cross Jeju Special Self-Governing Province Chapter and supported by the JDC Community Support Program, the school empowers multicultural and North Korean defector families to become self-reliant and valued members of the community.

40

41

Kang \*Gyu

34p

I imagine "Hondi Gallak" was a valuable opportunity for them to experience more than just travel, helping them build a global mindset and grow emotionally. As future leaders of Jeju as an international city, I hope they will have more opportunities and support to experience the wider world, discover themselves, and become more open to others.

Seong \*Mo

Seeing neighbors connect through bright smiles beyond the language barrier reminded me once again that true coexistence is not found in grand slogans, but in simple moments of sitting face to face and sharing warmth.

40p

I think "All Together School" is a warm place where people with very different life stories can become one big family. Seeing them come together without prejudice, I felt that JDC's kind support, helping everyone grow as confident members of Jeju without leaving anyone behind, makes our society a little brighter.

Building a Better  
Environment for Raising  
Children Together  
: A Workplace for Families

"Suneulum is on break starting next week. What should I do?" This common dilemma of school breaks remains a significant challenge for working parents. To ease the burden of childcare and create an environment where employees can focus on their work with peace of mind, JDC operated a Children's Sharing Program.

51

A Time for Shared Care and Learning

The dedicated space for the program was constantly filled with the sound of children's laughter. Children stayed active with their peers and engaged in various creative activities. Meaningful sessions such as table tennis and handicrafts were made possible through the talent contributions of fellow employees, adding a personal and communal touch to the experience.

I really enjoyed the theme of "Children Raised by Suneulum." Along with the title, JDC's own family-friendly childcare programs really stood out to me. It can be hard to balance work and childcare during school breaks, so I was especially impressed that employees could spend even a few days at work with their children.
